Afternoon

The link dosen't work and as for the soar farm.

My concerns are.

- Danger from the batteries burning out
- Disruption in the roads around the building site
- Danger to pedestrians along these routes
- Loss of valuable arable land
- Lack of compensation to surrounds communities

In short I do not want it. I think this would go to any community that has this type of project thrust upon them.

What studies have been done to show the ROI on a project like this and the impact on local communities.
