Dear Planning Inspectorate,

It is easy to see, as a local resident, that the Sunnica proposal will have a massive impact visually on the landscape. The sites in question will destroy good quality farmland, hedgerow and treelines and change the natural appearance of a large rural area to that of an industrial wasteland.

All areas of the Sunnica development are close to small villages and will be easily seen from the network of small roads linking these communities and thus have a large and negative impact on local residents and their mental health.

The amount of land that will be changed/destroyed by this development is simply far too much. It will not simply be changing parts of the landscape, it will become the landscape.

I fear that if this development goes ahead in its proposed form, it will be the end of some of these communities as we see them now.

Yours sincerely,
Daniel Cant.
