

Ian Garget

Sunnica Planning Inspector

26/1/24

Dear Sir

Sunnica Sola Farm EN010106

I wish to comment on the request for information letter dated 14th December 2023 and the applicants reply.

I am disappointed with the response from Natural England, they don't seem to feel the need or urgency to complete the survey of Stone Curlews. And have clearly said they have no time schedule to do so. How can the planning inspector complete the report without all the information.

From Sunnica's reply to the request for more information. Sunnica have made it clear that they feel they have made enough mitigation to the application. Yet everyone else feels that more can be done to mitigation of landscape, visual impact and the glint and glare assessment.

I get the impression that both Sunnica and Natural England have not presented any new evidence to support they application.

How can they be trusted, when so many questions are left unanswered.

Yours sincerely

Ian Garget
