

Submission ID: 13203

The Inspector should consider the connection of the SEP and DEP windfarms via Walpole as a viable alternative to the applicant's proposal and request information as to why this alternative was not properly considered as it is likely to have far less impact on local communities and the environment. Cumulative impacts of the Equinor projects with the already approved Hornsea 3 and Vanguard and Boreas projects must be considered by the examining authority in addition to the impact of East Anglia GREEN which is consequential on Sep and Dep.
