

Submission ID: 13214

This DCO should be refused on the grounds that a superior viable alternative using a connection to the grid at Walpole is available and the cumulative impact of this application together with the already approved other Round 3 projects will have an unacceptable impact on the environment and local communities in Norfolk.

In any event, ONLY construction Scenarios 1d and 2 should be permitted by the DCO.

Approval of this DCO would represent illegal pre-determination of the National Grid East Anglia GREEN project.
