

On behalf of the Norfolk Parishes Movement for an Offshore Transmission Network, we set out below our argument for an alternative grid connection point for the SEP and DEP projects. We believe strongly that the currently proposed connection to the grid at Norwich Main should be refused. An alternative grid connection, possibly at Walpole, should be proposed by the applicant for these projects. We address the cumulative impacts of the current proposal, the suitability of Walpole and consider precedents set by other planning applications. We believe the cumulative impacts of this DCO application with other radial connection projects make it an exceptional case and justify an alternative grid connection point for SEP and DEP.
