ID	North Norfolk District Comment	Applicant Response
1	<p>NNDC are in agreement with the Applicant's approach as set out in their response to Q3.17.3 Effectiveness of Mitigation Proposals. The proposed application of the DEFRA BNG Metric 4 will allow for detailed quantification of the ecological/arboricultural losses relating to removed vegetation and allow for a more appropriate and proportionate replacement planting than a set replacement ratio. As part of the replacement strategy, NNDC would recommend that the mitigation hierarchy is cited to demonstrate that replacement planting will be placed as close as reasonably possible to site of the removed vegetation. NNDC will confirm this position as part of the SoCG with the Applicant to be submitted in final form at Deadline 7.</p> <p>Given that the Applicant and NNDC are in broad agreement on this matter, NNDC do not propose to attend ISH 7.</p>	<p>The Applicant notes the agreement and thanks NNDC for their submission.</p>
