---

Dear Sir/Madam,

On the understanding that the application for a non-material change to the SEP and DEP Order is as per below, I can confirm MCA has no comments to make.

- Increase the maximum total rotor-swept area for SEP and DEP;
- Corresponding increases to the minimum air gap (that being the distance between the lowest point of the rotating blade of a wind turbine generator and the highest astronomical tide);
- Increases to the maximum number and length of interlink cables and the maximum number of interlink cable crossings;
- Increases to the maximum area and volume of cable protection for the interlink cables and for the DEP infield cables; and
- A reduction to the maximum number of DEP infield cable crossings.

Best regards,

Nick
