Subject: Proposed Medworth Energy from Waste Combined Heat and Power Facility

Good Evening

I am the Operations Director at Priden Engineering and also SB Components on Algores Way, for which the above infrastructure project would directly affect. Moreso in the case of Priden Engineering where the planned works intend to overlay into our work carpark.

Fundamentally we cannot accept this, and we are also disappointed we have not been well corresponded with on the development. We have received a generic letter in the post not directed to anyone, and it now appears we have missed a deadline with regards to being a registered party.

Clearly, we need to be incredibly well engaged with this proposal since you are intending to take land from our production facility.

Could you please register us as an interested party!

Chris Benton

Operations & Purchasing Director
