DEVELOPMENT CONSENT  
FOR THE PROPOSED  
MEDWORTH ENERGY  
FROM WASTE COMBINED  
HEAT & POWER  
END 010110

22-03-2023

Dear Sirs

I would like to advise that I am against the construction of the waste incinerator in Wibeck.

We are a small market town which will suffer greatly if the incinerator is built.

The site for the building is in the middle of some arable land, near housing and schools and will be three (3) times larger than the cold store building in the same area and there will be

a vast amount of pollution from the chimney stacks falling and endangering the health of everyone in a large area, not just Wibeck, plus the arable land which the country needs.

A further problem is the increase in traffic as plans show that waste will be brought in from over a 30 mile radius at least, possibly a wider radius. Our roads cannot cope with such a rise in traffic levels. We have no state way only ordinary A & B roads which are not even dual carriage ways, and most of them in pretty poor condition.

People in Wibeck and the

surrounding area will have great difficulty in going about their lives as they will find driving to King's Lynn / Peterborough etc very difficult indeed. The infrastructure for such as in flux of heavy vehicles is not there and it means the people of Wibeck & Fenland in general will not be able to move freely in our county!!

Please consider the above and not condemn us all to a life of misery.
