Subject: Medworth MVV Planning inspectorate

This letter or email is being written in support of MVV.

This is a followup is from in person meetings from the 12th & 13th of april at the wisbech boathouse.

Now i know this topic is going to be spoken about at the next lot of online meetings but i'm going to be raising these issues now rather than online.

The main subject here is: **traffic & road infrastructure**.

Now i just want to point out that some of arguements some people have raised with this incinerator are totally unfounded especially when it relates to the road & traffic networks.

I'm currently in a dispute with the **local council** or **all councils** for not already maintaining the roads like they should and trust me i see these roads every single day and these are absolutely atrocious and it's getting serious so much so it's a **health & safety issue** now but nobody is taking this **seriously**.

All the public keep getting is excuse after excuse and i'm sick and tired of it these **councils** keep going on about the money that they receive is suppose to go towards social care well i'd like to know were the care is because i definately don't see it and i'm sure others don't either and these **councils** can't keep on using social care as a **get out clause** when they receive money that they claim.

That i do feel this whole situation needs **investigating** and the **council tax needs overalling** as these **councils** are taking the **mick**.

I'm now going to talk about broad end road a site where the incinerator is also in plans to go to now i want to make it very clear dispite what the **councils** tell you.

That there are talks for changes to this stretch of road that i'm not in favour of and i don't **appreciate my tax money** being wasted on a proposed roundabout at the cross junction.

Near broad end road there is nothing wrong with that stretch of road i've travelled that stretch of road most of my life and it is totally safe to travel on.

But what i would say is like every other road around wisbech and beyond is it needs a good road resurface and before these councils start making drastic changes.

To these roads that are not **needed** maybe they should focus on **driver behaviour** has it is'nt the roads that are the problem but the **road users** that cause alot of the problems.

Also i want to remind the **councils** there is'nt such a thing as **accident blackspot** or whatever term you want to use as there is no such thing.

I'm not going to deny that there have'nt been accidents along the broad end stetch of road but no more than any other road which to me does'nt warrant a roundabout.

Also i want to highlight something in the comments that have been made previously with regards to that if MVV be granted that the incinerator gets built here that they will contribute to increase road accidents & road deaths etc.

Again another absolutely ridiculous statement to make it's a **inflammatory** without no **substance** or **proof** to back up that claim.

Like i have said before the **councils** have had years to sort these roads and have chosen to **squander our tax money** on things they should not have done.

tell me why does everyone else have to suffer for what these **councils** do ?

Another thing that is making me quite angry about this issue that it has been brought to my attention and that is before the go ahead for approval or any work is carried out that its the responsibility of MVV to carry out any works that need doing.

To the road and i'm afraid to inform anyone that its the **councils job** to carry out **these works** and someone in these **councils** need to figure out who controls **what** ?

And who's **responsibility** it is to **maintain these roads** because clearly nobody in **authority** does'nt have a clue in maintaining roads.

I can do a far better job repairing roads on my construction simulator.

Than these **councils** put together this is getting **shameful** on the **councils** part and they are **embarrassment** to this town and everywhere else.

And i'm sorry but nobody from the **council** or **highway** should'nt be allowed anywhere near making or formulating a opinion on our **roads** our **taxes** or this incinerator.

Now i know its MVV job to carry out any road repairs once work commences and the go ahead is given but any repairs before that is the **responsibility** of the **councils**.

It's about time these **councils grow up** stop acting like kids and do what they are suppose to do rather than destroying this town like they are doing.

This is my statement i know some of it will get taken on board and some of it won't but i have got my point of view across and abit of a rant to boot.

All of which i felt needed to be said i just want to take this time to say a thank you to the planning inspectorate for taking the time to listen to me and my concerns.

Mr W Cook
