Hi I spoke at the Medworth incinerator meeting wisbech and was asked to put in writing what my concerns are about the incinerator proposal in Wisbech . I am against having an incinerator of this size in wisbech my home town . It does not fit in with our rural town with a chimney bigger than Ely cathedral it is a terrible location for an incinerator. It is far to close to the largest school in the area where thousands of pupils go ... when they are outside playing sports with a giant chimney shadowing their school churning out toxic particulates on the school and the air they breath and also particulates landing on our agricultural land with Wisbech being a big part of agriculture for the whole of Englands food chain . Also the other primary schools in close proximity to the proposed incinerator Elm primary school , Meadowgate special needs school , Elm low road school ,Nene school, Ramnoth road school . Also many of the food factories within close proximity to the proposed incinerator who are also against having such a monstrosity so close to a place they produce food . Mr Carey has been circulating a list of factories who he allegedly said wanted to receive electricity from his incinerator my brother wrote to the factories on the list Lamb Weston being one of them and lamb Weston said we want nothing to do with the incinerator we don't want it and asked for banners saying stop the incinerator which they now have on their factory fences along Weasenham lane and Cromwell road my brother also wrote to Nestle purina who also said they don't want an incinerator near their factory . So why is my Carey saying these factories want electricity from his incinerator when they don't . Mr Carey also showed me on his computer what the incinerator would look like from my house I have attached the pictures it's an absolute monstrosity I live next to Thomas Clarkson school the largest school In proximity to the incinerator so they will also have the same view as me those poor children . Also the land he wants to build incinerator on is a flood plane as water rises which it is with climate change what will happen to all the land around the incinerator all the water mvv intends to use where's that all getting pumped too .Wisbech a small town a historic market town should not be used as a dumping ground to burn rubbish it's not the place for such a giant incinerator. What about the nature the water voles (endangered species) what about Welney wetland trust where hundreds of birds migrate every year . It is too close to so many important things too close to schools and our children , to close to food factories ,too close to nature and agriculture... Too close to Wisbech . Please please don't let this giant incinerator come to our small town our roads aren't made for all these lorries and extra traffic emergency services are already struggling as you heard at the incinerator meeting at the boat house . Many businesses of Algores way Boleness road etc will move to different locations and more Wisbech peoples jobs will be lost . There must be a better place to put such an incinerator away from a small historic rural town .

Nadine Ridgewell
