Anglian Water

Our Ref: EN010110

By Email

Date: 15 August 2023

Dear Sir/ Madam,

The Infrastructure Planning (Examination Procedure) Rules 2010 (as amended) – Rule 17

Application by Medworth CHP Limited for an Order Granting Development Consent for the Medworth Energy from Waste Combined Heat and Power Facility

Request for further information

We are writing under Rule 17 of the Infrastructure Planning (Examination Procedure) Rules 2010 (as amended) (EPR Rule 17). The Examining Authority (ExA) has considered the Deadline 6 and Deadline 7 submissions and has decided to seek further information and comments in relation to Water Environment.

Water Environment

In the context of Anglian Water's Water Resource Management Plan (WRMP) and the reduction in abstractions highlighted by the Environment Agency in its review of draft WRMPs (see [Section 7.2](#)¹), the ExA asks Anglian Water, under EPR Rule 17, to confirm that it is content with the conclusions and the approach set out in the Water Supply Availability Assessment [\[REP5-039\]](#), particularly in relation to water demands for the construction of the Proposed Development. If not, Anglian Water is asked to set out clearly any pre-commencement requirements it considers necessary to address its concerns.

Responses should be submitted by **Deadline 8 (Friday 18 August 2023)**.

Other Interested Parties may also wish to respond to this request.

Yours faithfully,
