

Submission ID: 20023

Dear Sir or Madam

Interested Party Number: 20033241

I write on behalf of Network Rail Infrastructure Limited (Network Rail) in relation to its objection to the Medworth Energy from Waste Combined Heat and Power Facility DCO (DCO) being promoted by Medworth CHP Limited (Promoter).

Network Rail and the Promoter have now agreed a form of private agreement which regulates the ongoing relationship between the parties and provides for entry into a voluntary agreement to grant the Applicant the land and rights necessary to deliver the proposed development. Engrossments of the private agreement are being prepared, subject to final formal approvals and sign off from Network Rail being obtained. These are required in order for Network Rail to authorise completion of the private agreement. On receipt of these final approvals, the parties will arrange for completion of the private agreement which will allow Network Rail to formally withdraw its objection to the DCO.

Network Rail continues to require that its standard protective provisions are included on the face of the Order, in accordance with previous correspondence on this point.

We will provide an update in due course.

Kind regards

Charlotte
