**Subject:** Nestle position on proposed Wisbech incinerator

Dear Simon

Thanks for taking the time to contact us and for your kind words about the positive impact that the Purina factory has made over the years in Wisbech. Stefano has asked that, as Nestle's Technical Director for the UK, I reply to you on the point you have raised about the potential incinerator investment in the locality.

Although energy from waste plants can play a valuable role in reducing the amount of waste going to landfill, we have no plans to partner with MVV Environment on their proposed project for Wisbech. In this instance we believe there are more appropriate alternatives which can deliver the renewable energy we need, in suitable locations, as part of our journey to net zero.

Thanks again for contacting us.

Best regards

Simon

Simon Billington

Technical Director, Nestle UK & Ireland

**This message is from an EXTERNAL SENDER. BE CAUTIOUS, particularly with links and attachments.**

---

Hi to Stefano and Mark.

I am Simon Ridgewell I live in a small town called Wisbech, which may or may not of heard of. It is of course the town where nestle purina has operated from for many years and kept many people in work.

But I wish to bring to your attention the planned building of an incinerator, the biggest in Europe indeed if allowed to progress. The proposed incinerator company MMV all ready seems to be claiming the backing of nestle purina to receive cheap electric /steam.... Is this the v case?. Having already spoke to lambweston another factory from Wisbech they do not support the building of this polluting monstrosity. But nestle purina has not replied when I have emailed customer services.

There are 8 schools within half a mile of this site, is nestle purina wanting to be a part of ruining these childrens health? Also up to 300 extra lorry a day to and from this site, traffic will increase by so do much which will affect your business, and cause possible deaths injury!!.

I write to you both for action that I hope you will not support this incinerator just to receive cheap electric. Purina is a postive for this town why go against that.

Mp Steven barclay does not support this, I dont think anyone does, only mvv trying to make money.

Below is a paragraph from nestle purina climate change plan.

## What are you doing to reduce the use of plastics in your packaging? Are you planning to become plastic-free?

At Purina, we believe that no packaging should end up as waste and we are committed that by 2025, 100% of our packaging will be reusable or recyclable. It is something we are working hard to achieve.

So why would nestle purina make all this effort to become plastic friendly and then go and use electric from a polluting monstrosity? Many thanks Simon Ridgewellwisbech Cambridgeshire
