Subject: EN010110: Medworth Energy from Waste Combined Heat and Power Facility

You don't often get email from [REDACTED]

Dear Sir or Madam:

Pursuant to the intended construction of the above facility at Wisbech, Cambridgeshire.

I object on the following grounds -

- 1/ that particle pollution will be widespread covering a large area exacerbated by the wind direction and flat land
- 2/ that the project will be sited very close to schools
- 3/ that the project will be sited very close to neighbouring industrial facilities
- 4/ that road congestion will increase
- 5/ that there will be no respite from industrial road traffic night and day
- 6/ that it is potentially injurious to health on account of 1/above
- 7/ that unlike other such developments of similar facilities, this is close to residential housing
- 8/ that likely environmental damage is contrary to achieving net-zero in the short or long term, a stated government objective

Yours faithfully,

*Michael G F Jennings BSc (Hons) Social Sciences (Open), Diploma Religious Studies (Open),
