Subject: Objections to Wisbech Incinerator

[You don't often get email from [REDACTED] Learn why this is important at <https://aka.ms/LearnAboutSenderIdentification> ]

Having read the scientific reports relating to climate change, the risk of flooding in Fenland due to rising sea levels, the government's proposals for clean air quality and the huge amount of opposition to a monstrous incinerator being built near a small towns community in an important agricultural area with mainly food industry to sustain it, I cannot believe that the Secretary of State is in any doubt that this plan by MVV should be turned down without reservation. No matter how much evidence you ignore about the lies in the proposal, about the impact on the infrastructure and planet this will bring, the fact that there is already a surplus of capacity for burning waste in UK and this is likely to continue to be the case as pressure to recycle and reuse continues surely means the proposal is a non starter? I have read countless objections based on solid fact as you must have done. What are you waiting for? Turn it down now.

Stephen Wenn
