**Subject:** Incinerator Objection

You don't often get email from [REDACTED]

The enormous task we have in front of us now is to submit reasons against building a monstrosity in what was the capital of the Fenland's, the Historic town of Wisbech.

What can I say suddenly now that might feel an adequate reason for holding up delaying or even stopping this obnoxious proposal.

As many feel we the little insignificant but proud fenland community the fight is perhaps over.

- MVV UK is part of the MVV Energie AG group
- Approx. 6,000 employees
- 3.9 billion € turnover

However I and many feel the fight has just begun, money links with money profit over folks lives is nothing new. Millions of pounds are at stake and a few wishy washy letters won't hold back the powers that be, I'm sure of that, but since we're putting pen to paper we can at least have your answers perhaps for later litigation at least I think that's fair after all, we all want open clarity don't we.

So rather than submitting suggestions let's ask a few questions yet to be asked or answered about the long term

Will you MVV  
over see environmental health checks ?

Will you MVV  
Contract out your incinerator

Will you MVV  
Have the local council own any part of this Incinerator

As once it's up and running like Portsmouth facing claims it's exceeding pollution targets, not being monitored by those in charge misleading the public by not reporting how much waste is being produced and subsequently sub contract out to another company

Will you MVV  
Give clarity to all areas concerning waste residue ( after burn toxic dust) before submitting your plans ?

Will you MVV  
Give us full clarity on  
How much toxic dust is being produced  
Where it will be taken to  
How it will be safely stored and any other risks involved it's greater harm to the environment now

it's been condensed to extremely carcinogenic properties ,

Will you MVV

stand accountable for long term health of local children suffering effects of unclean air due to nitrogen oxides , volatile organic chemicals and dioxins or any other pollution with direct result of the incinerator being built .

And will you MVV

or any other name subsidiaries or group you might like to form at a later date stand accountable financially to the health of the public As a result of pollution of the incinerator you built in Algores Way Wisbech

Will You MVV

approach the wildlife issues yourselves ? And stand accountable after your ecological survey under a section 4.2 of the outlined construction environment management plan ? Will you oversee the detailed design of the scheme and Biodiversity Net Gain scheme

Will you MVV

Stand accountable financially to farmers of the surrounding area through failing crops due to chemical fallout or any other outcome directly harming their work .

Will you MVV

financing them for their losses for then and future failure to sell crops from what could be a known hazardous area

If the answer is YES to all of the above and you can publicly address all concerns with honesty and integrity

I very much doubt it ?

We the people of Wisbech do not want it for all of the above reasons

If you simply can not give a straight answer to the hard working family's living here and the surrounding counties Energie AG group with appropriate 6000 employees with a staggering 3.9 Billion € turnover a year

Then I suggest you take this uncomfortable unconventional Odious proposal and build it away from a population struggling to rebuild its infrastructure and facilities,shops and outlets post Covid

Regards

Mr Payne
