Dear Secretary of State

Interested Party Reference number 20032868

I writing with grave concern about this Incinerator, and the effects of health of the people in the

Town and surrounding Area.

I Worked as an Electrical Engineer for many years on development, maintaining, and fault finding in many Industries working with filter systems.

This Incinerator will be the biggest in UK/Europe.

Bringing everybody's rubbish from Miles, Miles, and I mean miles

This Incinerator will have to burn massive amount of Rubbish, as its bigger than anything ever built.

No filters will Stop all Toxins escaping, there is no filter 100%.

90 metre Chimney stacks times 2 are built to project fumes over us to avoid us.

If you new the weather of this area its South Westerly three quarters year so fumes will go directly over Town Towards Kings Lynn and Surrounding Norfolk Coast this is fertile land also like the entire area six miles Lincolnshire, one mile Norfolk.

We then need to look at our Health issues from the fumes, Toxins , however small, or large, being emitted from this incinerator, who is legally responsible, who will take the blame with illnesses of the local community.

Who will we blame if one person gets ill.

This Incinerator is on the outskirts of a rural town agriculture area.

If it gets built it will be the biggest disaster ever for the town

My family Have lived and worked this area as farmer for 400 years, the area supplied foods through two world wars to the present day, the land is some of the best quality growing land in UK

We need to look after our land not Poison it.

This Incinerator need massive of Water to run and Cleaning protocol CIP

Water is a precious for us and our growing community.

Know body wants the bi product of steam for heat locally, it will for running ,but it will have to vent to the atmosphere most of its steam from the System waste.

By 2035 COP Stated no more incinerators start decommissioning them Europe Rest of the world let cut emissions lets stop polluting the atmosphere .

Boston Lincolnshire New Incinerator to be built 20 miles away

Peterborough Incinerator 20 miles away

Building then decommissioning in a few year will be a heavy bill to dismantle

We already have abandoned power stations locally spoiling the rural views .

building it on flood plain which has under river stream and moving silt  
So the cost of pile driving for the foundation on that base  
The Waste Product being delivered so close to town the smell Reported from the other site  
in The Summer is awful the rats etc increase as they live in surrounding Dykes Rivers  
breeding will go through the roof.  
300 Plus lorries extra on roads cannot take it especially om moving on silt.  
Cleaning those lorries more water to clean, wear and what goes does the drains.  
this Structure so close will Dwarf the town  
The Area will never recover if this is built.  
My Friend owns a large fresh food factory which will be next door ,200 full time workers  
these jobs will go as the High end Supermarket M&S Waitrose, when they do a site visit next  
to largest waste Incinerator in Europe they will terminate contracts, and we have many  
other food factories close to this site.  
Im pleaded with you to think for the people, there health, there mental wellbeing, the  
effects of this  
Incinerator on such a small Town catastrophic.  
Weve feed the country for centuries, with never been given anything only taken from us, or  
put on.  
My Mum died 16 months, ago Dad last August both born here as my other Ancestors.  
Mum in 1947 travelled Wisbech to Cambridge every day to study business by train.  
We had two station, all gone taken from us.  
Lets start investing Greener project's, Science Park Cambridge need workers, lets invest in  
greener renewable energy for the area lets change Thet's educate people  
The Wash and rivers Ouse, Nene, lets generate electricity  
Water we surrounded by water let build desalination plants  
I've read that last years news Plymouth Incinerator Smaller plant  
Problem with stench  
Ash Clouds falling on properties and Cars  
COPD Issues increasing  
This incinerator is a lot bigger  
Life Is about people looking after them, and there health must be your priority.  
Invest Tax payers money better, Invest in people, let start looking after our country and its  
people not turning it into a toilet.

Thank You for reading

Please excuse, had to hurry writing, need to get it for family, friends , and 300000 +  
residents Wisbech and district before deadline.

Thank you

Paul Merrell
