Subject: MVV Waste Incinerator, Wisbech

You don't often get email from [REDACTED] [Learn why this is important](#)

Dear Sirs,

I wish to register my objection to the above in the strongest possible terms. The project is ill-conceived for a number of , what are obvious to the majority of residents of Wisbech and surrounding areas, very important reasons.

The emissions will be toxic, despite what MVV say, and will blight the town and surrounding countryside. If the number of vehicle movements calculated to serve the project are to be believed then the road infrastructure will be unable to cope. The proposed location of the site will adversely affect the chances of Wisbech regaining it's rail link with March and hence the National Network. MVV's claims as to the number of facilities likely to benefit are wildly exaggerated and purely speculative. I trust this submission will be of interest and look forward to hearing from you.
John Knott (Resident of Wisbech)
