Subject: EN010110 Medworth incinerator

You don't often get email from [REDACTED] [Learn why this is important](#)

Interested party reference no: 20033213

My comments to the application for the Medworth incinerator in Wisbech are:

This will create huge air pollution from carbon monoxide, acid gasses, nitrogen oxides and cancer causing dioxins.

Which will cause high incidence of cancer and respiratory symptoms; congenital abnormalities and hormone defects.

Micro particles cannot be captured.

The road infrastructure is very congested already without hundreds of extra lorries.

All the surrounding food factories will have to close because they won't be able to meet health requirements. These are the biggest employers in the area.

Half of UK incineration emissions come from the burning of plastics.

Yours Sincerely

Craig Stewart
