Subject: Medworth Incinerator EN010110

Dear Secretary of State,

-
[Call to Refuse Medworth Incinerator EN010110](#)
[Incinerators increase carbon emissions and greenhouse gases](#)
[Lack of proof of community benefit](#)

I writing to ask you to refuse the Medworth Incinerator EN010110 in your role to bring about Net Zero, because the National Infrastructure Commission is asking the Govt to ban all future incinerators that do not have plans for carbon capture and storage. I understand

you are due to make the decision in November whether to allow this incinerator. The Medworth Incinerator does not have plans for carbon capture and storage.

Also, I do not believe it has been proven what the BENEFIT for the community in and around the site and the wider area is. Major projects such as these should show a clear and concise community benefit and I cannot see where this has been proven. I have followed the proposals, and, if you cut through the propaganda put forward by the contractor, it is clear there is no real and genuine benefit to the community.

Therefore, I believe it is your responsibility to refuse the application, and I hope you will take this responsibility seriously.

Thank you.

Sincerely

Andrew Taylor
