Summary of the Project:

The Application relates to the construction, operation, maintenance and decommissioning of an offshore wind farm, located approximately 10.5 kilometres off the coast of North Wales in the Irish Sea; including up to 50 wind turbine generators and associated infrastructure making landfall at Ffrith Beach, east of Rhyl, and in the County of Denbighshire, the installation of underground cables and the construction of an electrical substation and associated infrastructure in order to connect the development to the National Grid's existing substation at Bodelwyddan (the "Project").

The proposed DCO will, amongst other things, authorise the construction, operation and decommissioning of offshore and onshore elements to supply an offshore wind farm, including: an offshore wind turbine generating station with a gross electrical output capacity of over 350 megawatts, comprising up to 50 wind turbine generators with associated foundations, a maximum rotor diameter of 306m and a maximum tip height of 332m above Mean High Water Springs (MHWS); up to two offshore substation platforms with associated foundations; one meteorological mast with associated foundations, LiDAR buoys, mooring buoys and navigational buoys; installation of a subsea cable (up to 10km in length) to the Gwynt y Môr Offshore Wind Farm; a network of subsea inter-array cables (up to 116km in length) including cable protection, connecting the wind turbines to each other and to the offshore substation platforms including cable crossings; up to two subsea cable circuits including cable crossings, cable protection, from the offshore substation platforms to shore, with a total cable length of approximately 70km; cofferdams and trenchless installation works at landfall; and scour protection, as required, for foundations and cables.

The DCO would also authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation, maintenance and decommissioning of an offshore wind farm including: the permanent and compulsory acquisition of land and/or rights for the Project; overriding of easements and other rights over or affecting land for the Project; the application and/or disapplication of legislation relevant to the Project including, inter alia, legislation relating to compulsory acquisition; temporary construction areas and access roads together with works to secure vehicular and/or pedestrian means of access for the Project, including alterations to bridges and removal and remediation of groynes; and such ancillary, incidental and consequential provisions, permits and consents as are necessary and/or convenient.
