Good evening PINS Keadby 3 team,

Please find below confirmation that Anglian Water will not be participating in the Examination.

Subject: RE: Keadby 3 Low Carbon Gas Fired Generating Station DCO - Post Submission Technical Engagement

Good evening Colin & Susan

Thank you for previously consulting Anglian Water.

I have now reviewed the application documents and Anglian Water's own asset records and can confirm that the water infrastructure providers are Severn Trent and Yorkshire Water.

This is confirmed by the Book of Reference submitted with the application.

I note that Protective Provisions are included in the draft DCO Order which are principally a matter for Severn Trent and Yorkshire Water and which would if necessary also serve to protect Anglian Water's position.

I do not therefore proposed to make representations on the application and an Anglian Water Statement of Common Ground is unnecessary .

All,

Nothing to add – thank you. I trust this clarifies the principles/opportunities to get involved in the examination or I am happy to explain anything if unclear.

Kind regards

Colin

Good afternoon Darl

Thanks for getting in touch.

The deadline to register as an Interested Party (IP) has now passed (please see PINS advice on the application page [REDACTED]). However, if you do want to participate in examination, you will need to register as an IP. You can send a request to the ExA outlining the issues you are interested in at Keadby3@planninginspectorate.gov.uk.

We will be notified by PINS on whether your request is accepted and can, if required, begin our drafting of a Statement of Common Ground.

[REDACTED] is there anything you'd like to add?

Best regards

Susan

Subject: [EXTERNAL] RE: Keadby 3 Low Carbon Gas Fired Generating Station DCO - Post Submission Technical Engagement

Good afternoon Susan

I've replaced Stewart Patience at Anglian Water and am working my way through past consultation requests.

Can I check on the status of the request below and the next opportunity (if required) to consider the water infrastructure matters with the project to inform the Examination.

I would envisage that we would want to agree a Statement of Common Ground (if necessary)

and so you may want to set out the water infrastructure issues in a draft SoCG so that I may seek technical and legal colleagues comments.

EXTERNAL MAIL - Please be aware this mail is from an external sender -
THINK BEFORE YOU CLICK

Dear Sir or Madam

You may recall back in January this year that you provided comments following our statutory consultation on the proposals for a low carbon gas-fired electricity generation station at the existing Keadby Power Station site (attached for your convenience). Thank you for very much for your inputs.

The Application for a DCO for the Keadby 3 Low Carbon Gas Fired Generating Station was accepted by PINS at the end of June 2021. All of the application documents submitted can be inspected on the Planning Inspectorate website ([REDACTED]). We are therefore now in the pre-examination period and are presently issuing copies of the formal notification to all consultees (and via other methods e.g. newspapers) – the legal notice can be read ([REDACTED]). The notice provides the deadline (2 September) for each consultee to send their representation to the Planning

Inspectorate.

In advance of the deadline, we would be pleased to discuss any matter that you raised in your previous comments, or to signpost you, if you prefer, to the relevant information. We know that the key issue you were interested in was in relation to the option to abstract water from the River Trent, if the preferred option to abstract cooling water from the Stainforth and Keadby Canal was not feasible. The following documents are therefore likely to be of most relevance to this matter:

Schedule of Other Consents and Licences [REDACTED]
Chapter 2: EIA Methodology [REDACTED]
Chapter 4: The Proposed Development [REDACTED]
Chapter 12: Water Environment and Flood Risk [REDACTED]

To summarise, the abstraction from the Canal remains the Applicant's preferred option and is subject to ongoing pre-application discussions with the Canal and River Trust and Environment Agency. However, the Applicant has also assessed the effect of the alternative abstraction option from the River Trent, which would be subject to a variation of the Keadby 1 Power Station abstraction licence if this were), if this were pursued in Chapter 12. As explained in Chapter 2, abstractions from Keadby 1 Power Station would not occur concurrently with those of the operational Proposed Development.

Please let us know if there is anything we can assist further with. We look forward to hearing from you.
