Concern about the light pollution during construction and after construction of Keadby 3. The light pollution from Keadby 2 is too great and after contacting Jade Fearon regarding this matter is no better. My concern is how much more light pollution will Keadby 3 bring? I live in the countryside between [REDACTED] with a side view of the Keadby 1 and 2 Power stations. Keadby 1 is low lit and therefore acceptable, but Keadby 2 is hugely brightly lit and interferes with my personal outside space. Can it be assessed and reported on please. This impacts both [REDACTED] and [REDACTED] )
