

Affinity Water previously provided substantive relevant representations for deadline 1, which is still representative of its concerns with regard to this project. Since then the Applicant has had some engagement with Affinity Water, however this engagement has not been substantial and the Applicant has yet to provide an undertaking to cover Affinity Water's solicitors fees and any other costs, therefore the issues set out in the Statement of Common Ground Position Statement have not been developed further. Affinity have submitted its preferred Protective Provisions, which need to be secured to ensure the protection of its assets as detailed in its relevant representations.
