1 INTRODUCTION

1.1 THE PROPOSED DEVELOPMENT

- 1.1.1 The Five Estuaries Offshore Wind Farm (hereafter referred to as VE) is the proposed extension to the operational Galloper Offshore Wind Farm. The project includes provision for the construction, operation, maintenance and decommissioning of an offshore wind farm located approximately 37 kilometres off the coast of Suffolk at its closest point in the southern North Sea; including up to 79 wind turbine generators and associated infrastructure making landfall at Sandy Point between Frinton-on-Sea and Holland-on-Sea, the installation of underground cables, and the construction of an electrical substation and associated infrastructure near to the existing Lawford Substation to the west of Little Bromley in order to connect the development to National Grid's proposed East Anglia Connection Node substation, which would be located nearby.
- 1.1.2 All onshore connection infrastructure would be located in the administrative area of Tendring District Council, within Essex County Council. VE will have an overall capacity greater than 100 Megawatts (MW) and therefore constitutes a Nationally Significant Infrastructure Project (NSIP) under Section 15 (3) of the Planning Act 2008.
- 1.1.3 A full Project description is included in the Environmental Statement, in particular 6.2.1 Offshore Project Description [APP-069] and 6.3.1 Onshore Project Description [AS-004].
