

We request that AB Agri site is included in the Accompanied Site Inspection for the following reasons:

1. It is private and operational industrial site. Therefore, for health and safety reasons, it is not possible for the Examining Authority and any other parties to walk around the site unaccompanied.
2. it is absolutely critical that the Examining Authority visits the site itself in order to properly assess the relationship between the proposed development and AB Agri's operational area.
3. It is also absolutely critical for the Examining Authority to inspect the site to understand the operations at AB Agri site in order to understand our representations, particularly in relation to biosecurity.
