

Submission ID: 12552

I request a site visit to Church Farm, Flixborough, (which sits on the escarpment, above the proposed site) to assess the potential impact of the proposals. From the field between Flixborough village and the north east of the former railway line, it will be possible to assess the visual implications and in particular the consequences of clearing all vegetation and trees within 5m of either side of the rail line and the 100m clear felling envisaged at the level crossing.

Church Farm, which is bisected by the rail line (over which we have rights of way), has substantial areas which have compulsory purchase designations. The site can be accessed from Church Farmhouse yard
