

Submission ID: 13316

Amcotts is the nearest community to the proposed North Lincolnshire Green Energy Park, at just over 200mtrs. The construction and operation (24 hour working) will have a significant detrimental affect on the local environment and quality of life. This must on no account be overlooked by the planning inspectorate, and must include Amcotts in the itinerary of locations for an ASI. Suggested what 3 word coordinates, Tunes.Lime.Garden.
