

Submission ID: 13964

Hi, this whole process is confusing and has not been publicised to all residents. I sent emails in December 2020, none of which were replied to and I asked to be notified of progress and procedures. I have had nothing from you.

I have serious concerns about..

1. Pollution. There is no way that burning this amount of waste, will not decrease air quality and add harmful chemicals or pollutants. With the prevailing wind direction, this will be carried to Burton Stather.
2. The pollution will be harmful to people, animals and the general environment.
3. This is not just local waste, why should we accept refuse from all around the country, to burn here?
4. You appear to be "selling" the project on green energy production. This is just a by-product of the process. Your main money making incentive is from being paid to dispose of waste.
5. With waste being brought to the area, there will be considerable extra traffic both on the river and roads, causing further danger and disruption. All these aspects will severely reduce my quality of life and be harmful to my health. [REDACTED]

Please record my objections, and keep me notified of the process, so I can be involved in the future.

Kind regards
Trevor Zimmerman
