

Agenda item 2 -

i) Failure of Rampion 2 to provide sufficient detail and explanation to interested parties to enable them to make representations by requested deadline of 29th February (in particular, explanation of need for 100 m wide DCO corridor which is so wide as to make it hard to assess impacts of a 40m wide working strip within this).

ii) Unclear procedure set out by ExA - it appears detail of the application will be considered in Open Floor Hearing 1 on same day as preliminary hearing, and then in Issue Specific Hearing thereafter. We fail to see how Interested Parties' concerns can be fully addressed by the ExA given that these hearings are taking place prior to the submission of representations by IP's by the 29th February deadline.
