

To carve up a huge area of Sussex for this project, causing devastation to the countryside and massive disruption to those living along the cable route and near to the proposed substation. Not to mention those trying to go about their daily business is poorly thought out. Surely if this has to go ahead the best plan would be to use the existing Rampion 1 route and to extend the Wineham substation.

We fully support the evidence supplied by Cowfold v Rampion, our community voice.
