

We strongly believe that it's crucial for the Examining Authority to conduct a site visit at the relevant order plots affecting Mr. Dickson, specifically plots 25/1, 25/2, and 25/3. He needs to have an opportunity to the Examining Authority the disastrous impact of the proposed cable route how it impacts his personal circumstances. This demonstration can only be effectively done in person. We refer to the response to LR 1.16 raised by the ExA as to the principal reason why an ASI is required.
