1. Viewpoint directory

1.1 Introduction

1.1.1 This Appendix provides a complete directory of all the viewpoints used to inform the Landscape and Visual Impact Assessment (LVIA) of the onshore elements of the Proposed Development.

1.2 Viewpoint directory

1.2.1 The viewpoint directory includes:

- Viewpoints selected for the onshore substation options, landfall and onshore cable corridor at the Scoping stage (Rampion Extension Development Limited (RED), 2020);
- Viewpoints selected for the onshore substation options, landfall and onshore cable corridor in the Preliminary Environmental Information Report (PEIR) (RED, 2021) published as part of the first Statutory Consultation exercise in 2021;
- Viewpoints recommended for inclusion through the consultation process (including both non-statutory and statutory consultation);
- Viewpoints selected for the ES related to the onshore substation at Oakendene, the existing National Grid Bolney substation extension and the landfall and onshore cable corridor; and
- In addition some 3D wirelines have been included from locations along the onshore cable corridor close to the South Downs Way and within the South Downs National Park (SDNP).

1.2.2 The viewpoint directory includes all those viewpoints which have been deleted / relocated and / or suggested as new or alternative viewpoint locations through the consultation, design and assessment process.

1.2.3 It is accepted that a certain amount of micro-siting would have taken place on site as due diligence by the assessor and/or photographer in order to capture an optimum representative viewpoint photograph avoiding intervening features such as vegetation, buildings etc. Therefore, the final name and/or coordinates of the viewpoint location may be slightly different to that originally proposed as it has been refined but this has not been recorded. Only significant alterations to the viewpoints have been recorded in the directory that may have arisen from further assessment/investigation and/or comments during the consultation process.

1.2.4 The viewpoint directory should be read in conjunction with **Figures 18.2 to 18.4a-c, Volume 3** of the ES (Document Reference: 6.3.18) (updated at Deadline 4), which indicate the locations of all viewpoints included in the directory.

Final Viewpoint name / Grid reference	Viewpoint type / Receptors	Viewpoint Origin Document	Comments	Figure number
Oakendene substation viewpoints (Prefixed 'SA' substation option 'A')				
SA1: Kent Street 523166, 122139	Illustrative Road users	Preliminary Environmental Information Report (PEIR) 2021	<u>Consultation</u> <ul style="list-style-type: none"> No consultee comments specific to this viewpoint. <u>Actions Taken</u> <ul style="list-style-type: none"> Viewpoint confirmed – No further action required. 	Figure 18.10a-e, Volume 3 [APP-098] (Updated at Deadline 4)
SA2: A272 523191, 122767	Illustrative Road users	Preliminary Environmental Information Report (PEIR) 2021	<u>Consultation</u> <ul style="list-style-type: none"> WSCC email (26 November 2020) in response to Technical Note (October 2020) - <i>Will VP 2 encompass views from Southland Farm, or just road users of the A272?</i> Revised Technical Note (December 2020) - <i>Viewpoint 2 can only represent the receptors at that viewpoint (road users) however, the views from Southland Farm are well screened by roadside and garden vegetation with only negligible visibility likely during the winter months.</i> WSCC Written Representation and Local Impact Reports responses - <i>A272, looking directly south at newly created access point. This is essential and requires a visualisation. At present, viewpoint SA2 is too far east, underplaying likely effects.</i> Applicant - A viewpoint was considered at the new access point, but safety concerns precluded this location and Viewpoint SA2 was provided as an alternative. WSCC Statement of Common Ground and Meeting (23 January 2024) Agreement reached with WSCC and HDC to locate additional viewpoint to illustrate the view from the new access point (see Viewpoint SA9) on the field side of the hedge, subject to landowner access agreement. <u>Actions Taken</u> <ul style="list-style-type: none"> Viewpoint confirmed - No change to VP location. See additional VP location at SA9 for further information. 	Figure 18.11a-e, Volume 3 [APP-099] (Updated at Deadline 4)
SA3: PRoW 1786 Taintfield Wood 522925, 122068	Illustrative PRoW users	Preliminary Environmental Information Report (PEIR) 2021	<u>Consultation</u> <ul style="list-style-type: none"> WSCC Statement of Common Ground and Meeting (23 January 2024) Agreement reached with WSCC and HDC to locate additional viewpoint to the east of Taintfield Wood along PRoW 1787, viewing through 'gap' in hedge / field access to illustrate the view taking account of the onshore cable corridor works in addition to the substation construction. Existing SA3 Viewpoint noted as split between two 90° illustrations. <u>Actions Taken</u> <ul style="list-style-type: none"> Viewpoint confirmed - No change to VP location. Viewpoint SA3 re-presented at Deadline 4 to illustrate central part of 180° view previously split across two 90° illustrations, for ease of viewing. See additional VP location at SA12 for further information. 	Figure 18.12a-e, Volume 3 [APP-099] (Updated at Deadline 4)

Final Viewpoint name / Grid reference	Viewpoint type / Receptors	Viewpoint Origin Document	Comments	Figure number
SA4: PRoW 1775 Eastlands Farm, Cowfold 521838, 122038 (Omitted)	Illustrative Residents and PRoW users	Technical Note: Rampion 2 Offshore Wind Farm, dated October 2020	<p><u>Consultation</u></p> <ul style="list-style-type: none"> • WSCC email (26 November 2020) in response to Technical Note (October 2020) - <i>A VP along PROW 1775 to the west (south of Eastlands Farm). They will be a receptor and also this PROW may experience more open views.</i> • Applicant - <i>A similar viewpoint has been included on this PRoW for Substation Option B and will be cross referenced.</i> • HDC email (08 December 2020) in response to Revised Technical Note (December 2020) - <i>Nevertheless there was one additional View Point suggested by WSCC for substation option A figure 1, that we would have asked for too. This was View Point along PROW 1775 to the west (south of Eastlands Farm). Your response was that a similar View Point was being covered on option B although we could not see a View Point that covers this footpath as all of the View Points are situated to the east. Did you mean View Point 5 on Option C?</i> <p><u>Actions Taken</u></p> <ul style="list-style-type: none"> • It was confirmed that the VP to cross reference was VP SC5 also for substation option C (VP SA4) as shown on Figure 18.2a-c. Both viewpoints SA4 and SC5 were omitted due to lack of visibility of the proposed development due to vegetation screening as confirmed by site visits. 	N/A
SA5: PRoW 1730 between Dragons and Crateman's Farms 521640, 121178 (Omitted)	Illustrative Residents and PRoW users	Technical Note: Rampion 2 Offshore Wind Farm, dated October 2020	<p><u>Consultation</u></p> <ul style="list-style-type: none"> • No consultee comments specific to this viewpoint. • Viewpoint re-reviewed in light of comments from the Cowfold Residents' Impact Statement in respect of the onshore cable corridor. <p><u>Actions Taken</u></p> <ul style="list-style-type: none"> • Viewpoint omitted, substation and cable corridor not visible due to vegetation screening. 	N/A
SA6: PRoW 1750 north of Aglands 522362, 124049 (Omitted)	Illustrative PRoW users within High Weald AONB	Technical Note: Rampion 2 Offshore Wind Farm, dated October 2020	<p><u>Consultation</u></p> <ul style="list-style-type: none"> • No consultee comments specific to this viewpoint. <p><u>Actions Taken</u></p> <ul style="list-style-type: none"> • Viewpoint omitted, substation and cable corridor not visible due to vegetation screening. Note: viewpoint located on temporary construction access (A58) - No further action required. 	N/A
SA7: PRoW 1788 southwest of Site, west of Taintfield Wood 522569, 122111	Illustrative PRoW users	Preliminary Environmental Information Report (PEIR) 2021	<p><u>Consultation</u></p> <ul style="list-style-type: none"> • WSCC email (26 November 2020) in response to Technical Note (October 2020) - <i>A VP to the immediate southwest on PROW 1788. The nearest VP to the west is at some distance from the search area.</i> • Revised Technical Note (December 2020) - <i>Noted – this will be checked on site and included if there is a view into the site.</i> <p><u>Actions Taken</u></p> <ul style="list-style-type: none"> • Viewpoint confirmed and included within the Preliminary Environmental Information Report (PEIR) (RED, 2021) as part of the first Statutory Consultation exercise (July to September 2021) – No further action required. 	Figure 18.13a-e, Volume 3 [APP-099] (Updated at Deadline 4)

Final Viewpoint name / Grid reference	Viewpoint type / Receptors	Viewpoint Origin Document	Comments	Figure number
SA8: PRoW 1789 north of Eastridge Farm 524012, 122108	Illustrative PRoW users	Preliminary Environmental Information Report (PEIR) 2021	<p><u>Consultation</u></p> <ul style="list-style-type: none"> • WSCC email (26 November 2020) in response to Technical Note (October 2020) - <i>A VP on PROW 1789 just north of what is shown as Eastridge Farm on Figure 1 (as there are no other more distant views from the east).</i> • Revised Technical Note (December 2020) - <i>Noted – this will be checked on site and included if there is a view into the site.</i> <p><u>Actions Taken</u></p> <ul style="list-style-type: none"> • Viewpoint confirmed and included within the Preliminary Environmental Information Report (PEIR) (RED, 2021) as part of the first Statutory Consultation exercise (July to September 2021) – No further action required. I (i) and (ii): Chanctonbury Ring / Hill at trig point 513431, 112055	Specific PRoW users	Revised Technical Note: Rampion 2 Offshore Wind Farm, dated December 2020	<p><u>Consultation</u></p> <ul style="list-style-type: none"> Revised Technical Note (December 2020) - Due to the linear experience of the South Downs Way (SDW) along the edge of the chalk escarpment in this area we are proposing a series of linked sequential viewpoints between Amberly Mount and Chanctonbury Ring. In this area the following viewpoints are being considered and one of these (the best vantage point) will be illustrated, but all three will be included as part of the text based reporting of the assessment. NE consultation response to Revised Technical Note (December 2020) via email (07 December 2020) – suggest the addition of additional viewpoints along the South Downs Way national trail to give multiple sequential viewpoints along this important linear route. Such an addition would ensure the LVIA can more robustly demonstrate potential cumulative landscape and visual impacts of the proposed works on the South Downs National Park. SDNPA first Statutory Consultation exercise (July to September 2021) comment - Chanctonbury Hill (viewpoint I) - Chanctonbury Ring is clearly visible and intervisibility between the chalk ridge and the proposed works is clearly shown in viewpoints J1 (Figure 19.42) and J2 (Figure 19.43). We advise this is revisited. ETG Meeting (10 November 2022) – Additional Viewpoints requested by SDNPA to include: - Revisit Chanctonbury Hill to include Chanctonbury Ring. The above viewpoints are currently being undertaken, where appropriate, during November / December 2022 and will be included as part of the DCO Application. <p><u>Actions Taken</u></p> <ul style="list-style-type: none"> Viewpoint I(i) and I(ii) confirmed and included in sequential assessment (further VP Ia also included see below) – No further action required. 1.3 Glossary of terms and abbreviations

Table 1-2 Glossary of terms and abbreviations

Term	Definition
Development Consent Order (DCO) Application	An application for consent to undertake a Nationally Significant Infrastructure Project made to the Planning Inspectorate who will consider the application and make a recommendation to the Secretary of State for Business, Energy and Industrial Strategy, who will decide on whether development consent should be granted for the Proposed Development.
Development Consent Order (DCO) Limits	The limits of the land to which the Application for the DCO relates, within which the Authorised Development must be carried out and which is required for its construction and operation, as shown on the Land Plan including Order Limits.
Environmental Impact Assessment (EIA)	The process of evaluating the likely significant environmental effects of a proposed project or development over and above the existing circumstances (or 'baseline').
Environmental measures	Measures which are proposed to prevent, reduce and where possible offset any significant adverse effects (or to avoid, reduce and if possible, remedy identified effects).
Environmental Statement (ES)	The written output presenting the full findings of the Environmental Impact Assessment.
Horizontal Directional Drill (HDD)	HDD is a process whereby a tunnel is drilled under an obstacle and a cable duct is pulled through the drilled underground tunnel. It avoids the need for trenches, and enables minimal disruption to routing cables through rivers, roads, drains and other obstacles.
Nationally Significant Infrastructure Project (NSIP)	Nationally Significant Infrastructure Projects (NSIP) are major infrastructure developments in England and Wales which are consented by DCO. These include proposals for offshore wind farms with an installed capacity greater than 100MW.
Preliminary Environmental Information Report (PEIR)	The written output of the Preliminary Environmental Impact Assessment undertaken for the Proposed Development. It was developed to support the first Statutory Section 42 Consultation exercise in July to September 2021. The PEIR presented the preliminary findings of the assessment to allow an informed view to be developed of the Proposed Development, the assessment approach that had been undertaken, and the preliminary conclusions on the likely significant effects of the Proposed Development and environmental measures proposed.

Term	Definition
Rampion 1	The existing Rampion Offshore Wind Farm located in the English Channel off the south coast of England.
RED	Rampion Extension Development Limited
Scoping Opinion	A Scoping Opinion is adopted by the Secretary of State for a Proposed Development.
Scoping Report	A report that presents the findings of an initial stage in the Environmental Impact Assessment process.
Secretary of State	The Secretary of State of Department for Energy Security and Net Zero oversees the planning system and decision making with regards to development consent for offshore wind farms. This agent works within the relevant government department relating to the application.
The Planning Inspectorate	The Planning Inspectorate deals with planning appeals, national infrastructure planning applications, examinations of local plans and other planning-related and specialist casework in England and Wales.
The Proposed Development	The development that is subject to the application for development consent, as described in Chapter 4: The Proposed Development, Volume 2 of the ES (Document Reference: 6.2.4).
WTG	Wind turbine generators
