Kent Street traffic management plan, this is a disaster waiting to happen and is causing all involved significant stress and anxiety . we cannot get our heads around how a single farm track lane with width restrictions , bridges designed for small vehicles etc . this will make the lane unpassable and the already damaged grass verges will be destroyed. The plan has been ill thought through and will be a disaster

- when will a detailed assessment on size, weight be done to verify what the lane and bridges can cope with
- the access from the A272 down Kent Street will again be a disaster with residents and lorries being a toxic mix
- kent street is a hive of activity for local residents and this will be substantially eroded from horse riding , cycle riding , walking etc
- when will a survey report be produced by Rampion to answer all these concerns
- the planed destruction of trees and hedges get worse daily and when will we see the extent of this destruction on a plan and how awful the visual impact will be
- the timetable appears to have NO timeline
