RE: Rampion 2 - IPR RAM-476

At present we are trying to program a meeting that I and the Land Agent can make, which is quite tricky at this time of year with hay making, silaging and harvest on top of the fact it is so close to the deadline. We are being pushed into a corner that makes us come across as being non engaging and awkward, which is not true.

To have all of this viewed and legally set up within the time scale is not possible, however willing both parties are. No satisfactory Tenant Consent has been signed.

Rampion have had 4 years to sort this out and have left it so late in the day to negotiate.
