

Agenda Item 3: Annex C, which sets out the ExA's Initial Assessment of the principal issues, includes arrangements for the temporary stopping up of PRowS during construction, the disruption to PRowS during construction and decommissioning and the effects on views from PRowS, but does not mention the impact and design during the operational phase for those many PRowS which will be effected by the scheme. This is obviously a key issue, and should be a principal issue.
