Please provide an update on the expected timescale for adoption and whether this is likely to take place before the close of the Examination.	It is likely that later this month (Nov 2022) a certificate of completion will be issued in respect of the S278 agreement concerning the construction of the roundabout shown on Land Plan 1/1a. This will formerly adopt the area subject to maintenance being the responsibility of the developer until issue of a maintenance certificate. Maintenance certificates will be issued a minimum of 24 months after the issue of the completion certificates. The two lengths of road NE and SW of the roundabout do not form part of this adoption. Planning applications that affect the alignment of these roads are anticipated in the near future as part of the development of this area. The extent of any adoption beyond the aforementioned roundabout is unknown. Discussions are ongoing between the Applicant, developer and Host Authorities regarding any required amendments to the Land Plans and limits of the DCO affected by adoption.
