

Accompanied Site Inspection Request – Boston Borough Council

1. Boston Borough Council has seen the ASI plan prepared by the applicant that they will submit at deadline 1. We support the suggestion of the Examining Authority visiting the area where the trees will be removed at Bicker Fen Substation indicated by the red star below and the letter I on the applicant's map.

2. Additionally, the locations for the two non NSIP solar schemes can be viewed. The hedging proposals are shown on the above plan with the Borough Boundary in black.
3. The proposed tree planting that BSIDB highlighted during the Issue Specific Hearing on 20 September 2023 may also be identified during the site inspection, if that information is submitted at this deadline.
