

As requested by Examiner at the recent ISH2 hearings, I am submitting information regarding an alternative to the existing proposals for compensatory tree planting.

At the hearings, I stated that the Board were working with a local landowner and the Forestry Commission regarding a potential area of woodland and pond areas for educational purposes for local schools, located to the east of the Bicker Fen NGED substation.

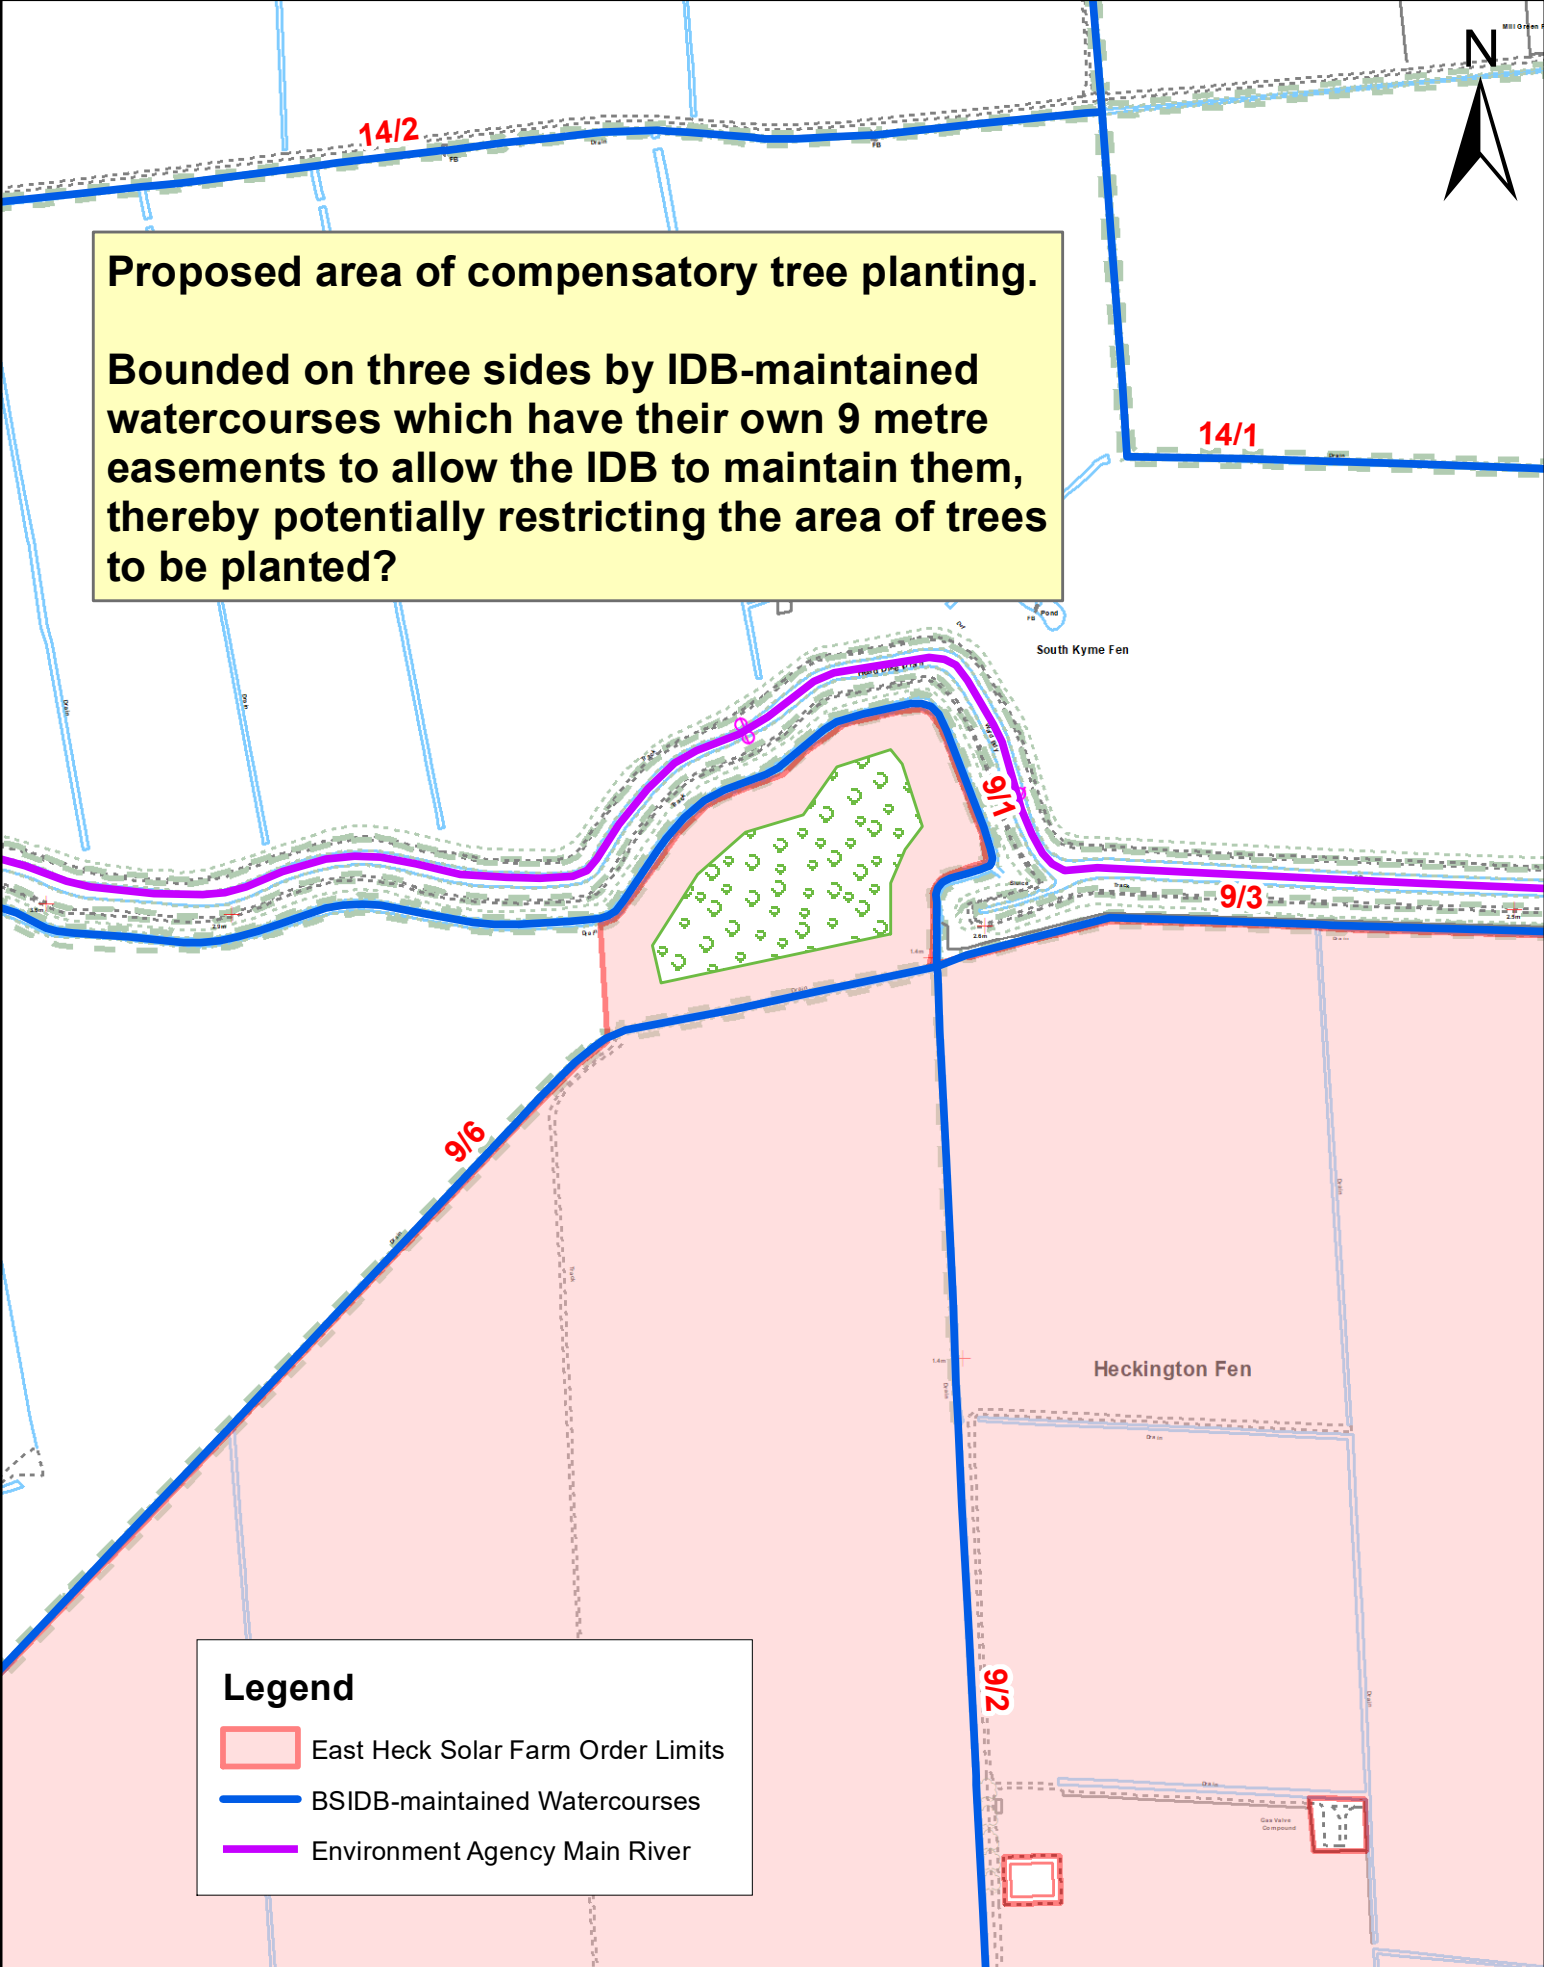

Please find attached 3 no. maps showing the location of the proposed tree planting within the order limits and the proposed educational woodland in relation to the order limits.

It is my understanding that the applicant is also in correspondence with the relevant landowner regarding their proposals.

Proposed area of compensatory tree planting.

Bounded on three sides by IDB-maintained watercourses which have their own 9 metre easements to allow the IDB to maintain them, thereby potentially restricting the area of trees to be planted?
