Application for Development Consent for Nationally Significant Infrastructure Projects under the Planning Act 2008

* required information

Application Form

Please read guidance documents relating to the submission of applications prior to completing this form including [government guidance](#) and the Planning Inspectorate's [Advice Note Six: Preparation and submission of application documents](#).

* Do you have a reference number?

Yes No

* Reference number

1. Applicant

* Organisation

Address

* Building number or name

* Street

* City or town

County or administrative area

* Postcode

* Country

* Name of contact

* Telephone number

Fax number

* Email

2. Agent

* Are you an agent acting on behalf of the Applicant?

Yes No

3. Fee

* State the arrangement for the application fee payment:

BACS CHAPS Cheque

EN010125

4. Confirming why the Planning Inspectorate should receive the application

* Brief statement to explain why this application is, or is to be treated as, a development for which development consent is required under the Planning Act 2008

The Dogger Bank South (DBS) East and DBS West offshore wind farms (herein 'the Projects') are proposed offshore wind farms to be located in the southern North Sea. The Projects will consist of two offshore generating stations with a capacity greater than 100 MW and is therefore defined as a Nationally Significant Infrastructure Project (NSIP) under Section 15(3) of the Planning Act 2008 (the '2008 Act'). As such, there is a requirement to apply for a Development Consent Order (DCO) to the Planning Inspectorate (PINS), who administer the examination of applications on behalf of the Secretary of State (SoS) for the Department for Energy Security and Net Zero (DESNZ). Further details can be found in the Environmental Statement (ES), Volume 7, Chapter 5 Project Description (application ref: 7.5).

5. Non-technical description of the Proposed Development

* Brief non-technical description of the Proposed Development

The Projects will consist of two offshore generating stations with a capacity greater than 100 MW. The Projects will include all associated offshore and onshore infrastructures necessary for the generation and transmission of electricity.

Whilst the Projects are the subject of a single DCO application (with a combined Environmental Impact Assessment [EIA] process and associated submissions), each Project is assessed individually so that mitigation is Project specific (where appropriate). As such, the assessments cover the following three Development Scenarios:

- DBS East or DBS West are developed In Isolation (the In Isolation Scenario);
- Both DBS East and DBS West are developed Concurrently (the Concurrent Scenario); or
- Both DBS East and DBS West are developed Sequentially (the Sequential Scenario)

The following principles set out the framework for how the Projects may be developed:

- DBS West and DBS East may be constructed at the same time, or at different times;
- If built In Isolation, either Project could be constructed in five years;
- If built Concurrently, both Projects could be constructed in five years;
- If built Sequentially, construction on either Project could commence first, but with staggered / overlapping construction;
- If built Sequentially, construction of the first Project would be completed within five years, with construction of the second Project being completed within seven years

The DCO for the Projects would authorise the construction, operation, maintenance and decommissioning of up to 200 wind turbine generators. Depending on the Development Scenario, the Array Areas would be connected to one another via Inter-Platform Cables, with a maximum of six electrical platforms combined between the Projects. The Offshore Export Cables Corridor would connect the Array Areas with the landfall near Skipsea. These would consist of up to four electrical cables and two fibre-optic communications cables along an integrated corridor where the cable corridors serving each Project would diverge into two branches serving the individual Projects. Two electrical cables and one fibre-optic cable would be located within each branch. The fibre-optic cables would be bundled with the electrical cables up to the nearshore, at which they may split out into separate trenches towards the landfall. As such, up to six trenchless crossing ducts may be required for the Projects at landfall. An Onshore Export Cable Corridor would link the landfall with the newly constructed Onshore Converter Stations before onward Cable Connection to the proposed Birkhill Wood National Grid Substation.

In order to deliver the power to the National Grid, the Projects would use High Voltage Direct Current (HVDC) to

Continued from previous page...

transmit electricity generated offshore to the landfall and onward to the Onshore Converter Stations. The onward transmission from the Onshore Converter Stations to the proposed Birkhill Wood National Grid Substation would use High Voltage Alternating Current (HVAC).

The Onshore Converter Stations would be located in the proximity to the onshore grid connection points at the proposed Birkhill Wood National Grid Substation and includes all necessary electrical plant to meet the requirements of the National Grid.

6. Location or route of the Proposed Development

* Description of location of application site(s), or route of development (reference to appropriate plans)

The DBS West and DBS East Array Areas will have a combined area of approximately 874km² and will be located approximately 100km and 122km from the coast respectively at their closest points. The Offshore Export Cables will make landfall near Skipsea. From landfall, the underground Onshore Export Cables will travel 32 km to connect to two Onshore Converter Stations located to the south-east of Beverley. A further 2.5km onward cable connection is required to connect to the proposed Birkhill Wood National Grid Substation which is located to the south of Beverley. Further details of the onshore and offshore works location are contacted within Volume 2, Location Plans (application refs: 2.1 and 2.2).

* Is the site a single site or a linear site?

Single site

Linear site

22. Additional information for specific types of infrastructure

* Additional information is required to be submitted in accordance with Regulation 6 of The Infrastructure Planning (Applications: Prescribed Forms and Procedure) Regulations 2009:

- Yes No

* Provide a brief description

For the construction of an offshore generating station, regulation 6(1)(b)(i) requires details of the proposed route and method of installation for any cable to be provided. Details are provided in the following documents (also in document references below):

- Volume 2, Works Plan (Offshore) (application ref: 2.5);
- Volume 2, Works Plan (Onshore) (application ref: 2.6);
- Volume 7, ES Chapter 4 Site Selection and Assessment of Alternatives (application ref: 7.4);
- Volume 7, ES Chapter 5 Project Description (application ref: 7.5); and
- Volume 8, Cable Statement (application ref: 8.20)

In addition, regulation 6(1)(b)(ii) requires a statement as to whether application will be made for safety zones to be provided. This can be found in Volume 8, Safety Zone Statement (application ref: 8.19).

Regulation 6 of the Infrastructure Planning (Applications: Prescribed Forms and Procedures) Regulations 2009 requires additional information to be submitted with the following types of development.

* Please check any of the following boxes that apply:

- Construction or extension of a non offshore generating station (Reg. 6 (1a))
- Construction or extension of an offshore generating station (Reg. 6 (1b))
- Highway related development (Reg. 6 (2) (part 1))
- Construction or alteration of a railway (Reg. 6 (2) (part 2))
- Construction or alteration of harbour facilities (Reg. 6 (3))
- Construction of a pipeline (Reg. 6 (4))
- Construction or alteration of a hazardous waste facility (Reg. 6 (5))
- Construction of a dam or reservoir (Reg. 6 (6))

Construction or extension of an offshore generating station (Reg. 6 (1b))

* Provide details of the proposed route and method of installation for any cable

The Application is for an offshore generation station that falls within regulation 6(1)(b). The proposed route and method of installation for any cables (offshore and onshore works) are provided in Volume 8, Cable Statement (application ref: 8.20) and Volume 7, ES Chapter 5 - Project Description (application ref 7.5) and the route is detailed in Volume 2, Works Plans (application ref: 2.5 and 2.6).

* Provide a statement as to whether applications will be made for safety zones

The Application is for an offshore generation station that falls within regulation 6(1)(b). The Applicant has therefore supplied a Safety Zone Statement (Volume 8, application ref: 8.19) that explains the applications that will be made for safety zones during the construction and operation of the Projects and the likely timing of those applications.

23. Any other plans, drawings and sections necessary to describe the proposal for which development consent is sought, and any other documents, reports or information to support the application

Continued from previous page...

Provide a brief description of any other plans, drawings and sections that are being submitted with this application

24. Other consents/ licences required under other legislation

* Other consents/ licences are required:

- Yes No

* Provide a list of consents/licences

Below provides a list of onshore and offshore consents, licenses and permits listed in Volume 8, Other Consents and Licences (application ref: 8.3), which the Applicants may need to obtain to enable the construction, operation, maintenance and decommissioning of the Projects.

Onshore Consents:

- a) An Environmental Permit for water discharge or waste operations / registration of exempt waste operations and water discharges (as necessary) under the Environmental Permitting (England and Wales) Regulations 2016;
- b) A Water Abstraction Licence (if required) under the Water Resources Act 1991;
- c) A Temporary Traffic Regulation Order (if construction phase requires temporary revisions to traffic regulations and temporary closure (with diversion) of a Public Right of Way) under the Road Traffic Regulation Act 1984;
- d) A Notice of Street Works under the Traffic Management Act 2004;
- e) A Permit for transport of abnormal loads (if necessary) under the Road Vehicles (Authorisation of Special Types) (General) Order 2003 and the Road Traffic Act 1988;
- f) A Consent to alter the highway under the Section 278 of the Highways Act 1980;
- g) A Consent to drill under the highway under the Highways Act 1980;
- h) A Consent to drill under a railway under the Railways Act 1993;
- i) A Section 16 Wildlife and Countryside Act License under the Wildlife and Countryside Act 1981;
- j) A European Protected Species (EPS) Licence under the Conservation of Habitats and Species Regulations 2017;
- k) A District Level Licence (DLL) for Great Crested Newts under the Wildlife and Countryside Act 1981 and Conservation of Habitats and Species Regulations 2017;
- l) A Licence for work affecting badgers under the Section 10 of the Protection of Badgers Act 1992;
- m) An Application for a 'Part B' permit for crushing and screening under the Local Authority Pollution Prevention

Continued from previous page...

and Control Pollution Prevention and Control Act and Environmental Permitting (England and Wales) Regulations 2016;

n) A Section 61 under the Control of Pollution Act 1974; and

o) A Building Regulation approval (if necessary) under the Building Regulations 2010.

Offshore Consents:

a) An Appropriate Assessment and Habitat Regulations Assessment (HRA) under the Conservation of Habitats and Species Regulations 2017;

b) An EPS Licence under the Conservation of Offshore Marine Habitats and Species Regulations 2017;

c) A Stage 1 Marine Conservation Zone Assessment (MCZA) under the Marine and Coastal Access Act 2009;

d) A Marine Licence for UXO Clearance under the Marine and Coastal Access Act 2009;

e) A Coast Station Radio Licence under the Wireless Telegraphy Act 2006;

f) A Decommissioning Scheme under the Energy Act 2004;

g) A F10 – Notification of Construction Projects under the Construction (Design and Management) Regulations 2015;

h) Safety Zones under the Energy Act 2004; and

i) An Energy Generation Licence under the Electricity Act 1989.
