DOGGER BANK SOUTH OFFSHORE WIND FARMS

SECTION 48 PLANNING ACT 2008

REGULATION 4 INFRASTRUCTURE PLANNING (APPLICATIONS: PRESCRIBED FORMS AND PROCEDURE) REGULATIONS 2009

REGULATION 4 INFRASTRUCTURE PLANNING (ENVIRONMENTAL IMPACT ASSESSMENT) REGULATIONS 2017

NOTICE PUBLICISING A PROPOSED APPLICATION FOR A DEVELOPMENT CONSENT ORDER

(“DCO”)

Notice is hereby given that RWE Renewables Dogger Bank South (West) Limited and RWE Renewables Dogger Bank South (East) Limited (the “Applicant”) of Windmill Hill Business Park, Whitehill Way, Swindon, Wiltshire, United Kingdom, SN5 6PB intends to apply to the Secretary of State for Energy Security and Net Zero under Section 37 of the Planning Act 2008 for the above mentioned DCO. The proposed development comprises two offshore wind farms; Dogger Bank South West and Dogger Bank South East, herein known as ‘the Projects’.

The Projects include provision for the construction, operation, maintenance and decommissioning of two offshore windfarms located approximately 100km from the Yorkshire coast at its closest point in the shallow area of the North Sea known as Dogger Bank. The application provides for two separate sites known as DBS West and DBS East.

Up to 200 wind turbine generators will be installed across both Projects, together with associated offshore and onshore infrastructure. Associated infrastructure (at a capacity which will also serve a wider grid network purpose) includes offshore platforms, the installation of underground offshore and onshore cables, and the construction of an electrical substation and associated infrastructure in the vicinity of Beverley. The wind turbine generators and offshore platforms will be located within the offshore array areas, and will be connected to each other via interarray and interconnector cables, and will be fixed to the seabed with foundation structures. The electricity generated by the wind turbine generated will be transported to the national grid via cables which will make landfall in the vicinity of Skipsea between Bridlington and Hornsea, and connect to National Grid’s proposed Creyke Beck Connection Node substation via the Projects’ onshore substation. All onshore infrastructure will be located in East Riding of Yorkshire.

The proposed Development Consent Order will, amongst other things, authorise components including:

Offshore

1. Up to 200 wind turbine generators across both Projects with associated foundations and scour protection.
2. Offshore platforms, including offshore substation platforms, offshore converter platforms, collector platforms, a Reactive Compensation Platform, an Electrical Switching Platform and/or an Accommodation Platform.
3. Foundation structures and scour protection for wind turbines and offshore platforms.
4. A network of subsea inter array cables including cable protection, connecting the wind turbines to each other and to offshore platforms, including cable crossing.
5. Inter-platform cables including cable protection, connecting the offshore platforms to each other, including cable crossings.
6. Offshore export cables from the array areas to the landfall.

Onshore

1. Landfall and associated transition joint bays located near to Skipsea approximately halfway between Bridlington and Hornsea to connect the offshore cables and the onshore cables.
2. Onshore export cables installed underground from the transition joint bays to the onshore substations and associated joint bays and link boxes.
3. Onshore substations together with associated equipment, accesses, landscaping and onward 400 kilovolt connection to a proposed new National Grid substation near Creyke Beck, to the south of Beverley.
4. Trenchless crossing locations (e.g. Horizontal Directional Drilling (HDD)).
5. Construction and operational accesses.
6. Construction compounds.
7. Associated and/or ancillary works including archaeological and ground investigations, drainage works, highway improvements, works to alter the position of existing utilities, works to watercourses, landscaping and other mitigation and monitoring works.
8. Such other works as may be necessary or expedient for the purposes of or in connection with the construction, operation, maintenance or decommissioning of the Project.
9. If required, temporary stopping up, diversion or alteration of streets, roads and Public Rights of Way.
10. If required, the permanent and compulsory acquisition of land and rights for the Project.
11. If required, overriding of easements and other rights over or affecting land for the Project.
12. If required, the application and/or disapplication of legislation relevant to the Project including inter alia legislation relating to compulsory acquisition.
13. Such ancillary, incidental and consequential provisions, permits and consents as are necessary and/or convenient.

The Projects have a generating capacity in excess of 100MW and therefore are classified as Nationally Significant Infrastructure Project under s14 and s15(3) of the Planning Act 2008. In addition, the Projects are Environmental Impact Assessment developments for the purposes of the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017. Accordingly, the Applicant is making preliminary environmental information available and the proposed application for a DCO will be accompanied by a full Environmental Statement.

A copy of the Preliminary Environmental Information Report (PEIR) and non-technical summary (NTS), and plans and maps showing the nature and location of the proposed development may be inspected free of charge in the exhibition section of the Applicant's website www.doggerbanksouth.co.uk from 6 June 2023.

The NTS, as well as other consultation materials, will also be available in hard copy at the deposit locations below. Opening hours are subject to change, please check before making a special trip. Each deposit location has computer facilities available for public use which will allow access to the PEIR and other consultation documents on the Applicant's website.

If you have any queries in relation to the consultation documents, plans and maps, or require alternative methods for inspection of the consultation documents, plans and map, please telephone the Applicant on: [REDACTED]. We are able to provide guidance on using the Projects website or can, upon request, provide a USB stick free-of-charge containing the PEIR. Hard copies of the NTS, the Statement of Community Consultation, the consultation brochure, plans and maps, and a feedback form can also be provided free-of-charge upon request during the consultation period. Hard copies of the PEIR will be subject to a maximum charge of £1,000 to cover printing costs. The documents (which include plans showing the nature and location of the proposed development) will be available for inspection on the Applicant's website and at the deposit locations until 17 July 2023.

This consultation will take place from **6 June 2023 to 17 July 2023**. Any person may comment on the proposals for the Projects or otherwise respond to this notice. The consultation brochure and feedback form explain the specific topics on which the Applicant is seeking feedback, although consultees are not restricted to commenting on these issues and the Applicant welcomes feedback on any aspect of the Projects.

Any responses in respect of the Projects should be sent:

(1) by email to [REDACTED] or

(2) by post to 'Freepost DBSOWF'. No further postal address or stamp is required.

The deadline for responses is **11:59pm on Monday 17 July 2023**, postal responses must be sent on or before this deadline. Responses should explain who is making the response and give an address for future correspondence. Responses may be made public. Please note that any consultation responses received after this date may not be considered.

9. If required, temporary stopping up, diversion or alteration of streets, roads and Public Rights of Way.
10. If required, the permanent and compulsory acquisition of land and rights for the Project.
11. If required, overriding of easements and other rights over or affecting land for the Project.
12. If required, the application and/or disapplication of legislation relevant to the Project including inter alia legislation relating to compulsory acquisition.
13. Such ancillary, incidental and consequential provisions, permits and consents as are necessary and/or convenient.

The Projects have a generating capacity in excess of 100MW and therefore are classified as Nationally Significant Infrastructure Project under s14 and s15(3) of the Planning Act 2008.

In addition, the Projects are Environmental Impact Assessment developments for the purposes of the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017.

Accordingly, the Applicant is making preliminary environmental information available and the proposed application for a DCO will be accompanied by a full Environmental Statement.

A copy of the Preliminary Environmental Information Report (PEIR) and non-technical summary (NTS), and plans and maps showing the nature and location of the proposed development may be inspected free of charge in the exhibition section of the Applicant's website www.doggerbanksouth.co.uk from 6 June 2023.

The NTS, as well as other consultation materials, will also be available in hard copy at the deposit locations below. Opening hours are subject to change, please check before making a special trip. Each deposit location has computer facilities available for public use which will allow access to the PEIR and other consultation documents on the Applicant's website.

If you have any queries in relation to the consultation documents, plans and maps, or require alternative methods for inspection of the consultation documents, plans and map, please telephone the Applicant on: 0800 254 5459 or email: dbs@rwe.com. We are able to provide guidance on using the Projects website or can, upon request, provide a USB stick free-of-charge containing the PEIR. Hard copies of the NTS, the Statement of Community Consultation, the consultation brochure, plans and maps, and a feedback form can also be provided free-of-charge upon request during the consultation period. Hard copies of the PEIR will be subject to a maximum charge of £1,000 to cover printing costs. The documents (which include plans showing the nature and location of the proposed development) will be available for inspection on the Applicant's website and at the deposit locations until 17 July 2023.

This consultation will take place from **6 June 2023 to 17 July 2023**. Any person may comment on the proposals for the Projects or otherwise respond to this notice. The consultation brochure and feedback form explain the specific topics on which the Applicant is seeking feedback, although consultees are not restricted to commenting on these issues and the Applicant welcomes feedback on any aspect of the Projects.

Any responses in respect of the Projects should be sent:

(1) by email to dbs@rwe.com; or

(2) by post to 'Freepost DBSOWF'. No further postal address or stamp is required.

The deadline for responses is **11:59pm on Monday 17 July 2023**, postal responses must be sent on or before this deadline. Responses should explain who is making the response and give an address for future correspondence. Responses may be made public. Please note that any consultation responses received after this date may not be considered.

**TOWN AND COUNTRY PLANNING DOGGER BANK SOUTH OFFSHORE WIND FARMS SECTION 48 PLANNING ACT 2008
REGULATION 4 INFRASTRUCTURE PLANNING (APPLICATIONS: PRESCRIBED FORMS AND PROCEDURE) REGULATIONS 2009
REGULATION 4 INFRASTRUCTURE PLANNING (ENVIRONMENTAL IMPACT ASSESSMENT) REGULATIONS 2017
NOTICE PUBLICISING A PROPOSED APPLICATION FOR A DEVELOPMENT CONSENT ORDER ("DCO")**

Notice is hereby given that RWE Renewables Dogger Bank South (West) Limited and RWE Renewables Dogger Bank South (East) Limited (the "Applicant") of Windmill Hill Business Park, Whitehill Way, Swindon, Wiltshire, United Kingdom, SNS 6PB intends to apply to the Secretary of State for Energy Security and Net Zero under Section 37 of the Planning Act 2008 for the above mentioned DCO. The proposed development comprises two offshore wind farms; Dogger Bank South West and Dogger Bank South East, herein known as 'the Projects'.

The Projects include provision for the construction, operation, maintenance and decommissioning of two offshore windfarms located approximately 100km from the Yorkshire coast at its closest point in the shallow area of the North Sea known as Dogger Bank. The application provides for two separate sites known as DBS West and DBS East.

Up to 200 wind turbine generators will be installed across both Projects, together with associated offshore and onshore infrastructure. Associated infrastructure (at a capacity which will also serve a wider grid network purpose) includes offshore platforms, the installation of underground offshore and onshore cables, and the construction of an electrical substation and associated infrastructure in the vicinity of Beverley. The wind turbine generators and offshore platforms will be located within the offshore array areas, and will be connected to each other via interarray and interconnector cables, and will be fixed to the seabed with foundation structures. The electricity generated by the wind turbine generators will be transported to the national grid via cables which will make landfall in the vicinity of Skipsea between Bridlington and Hornsea, and connect to National Grid's proposed Creyke Beck Connection Node substation via the Projects' onshore substation. All onshore infrastructure will be located in East Riding of Yorkshire.

The proposed Development Consent Order will, amongst other things, authorise components including:

Offshore

1. Up to 200 wind turbine generators across both Projects with associated foundations and scour protection.
2. Offshore platforms, including offshore substation platforms, offshore converter platforms, collector platforms, a Reactive Compensation Platform, an Electrical Switching Platform and/or an Accommodation Platform.
3. Foundation structures and scour protection for wind turbines and offshore platforms.
4. A network of subsea inter array cables including cable protection, connecting the wind turbines to each other and to offshore platforms, including cable crossing.
5. Inter-platform cables including cable protection, connecting the offshore platforms to each other, including cable crossings.
6. Offshore export cables from the array areas to the landfall.

Onshore

1. Landfall and associated transition joint bays located near to Skipsea approximately halfway between Bridlington and Hornsea to connect the offshore cables and the onshore cables.
2. Onshore export cables installed underground from the transition joint bays to the onshore substations and associated joint bays and link boxes.
3. Onshore substations together with associated equipment, accesses, landscaping and onward 400

kilovolt connection to a proposed new National Grid substation near Creyke Beck, to the south of Beverley.

4. 4. Trenchless crossing locations (e.g. Horizontal Directional Drilling (HDD)).
5. 5. Construction and operational accesses.
6. 6. Construction compounds.
7. 7. Associated and/or ancillary works including archaeological and ground investigations, drainage works, highway improvements, works to alter the position of existing utilities, works to watercourses, landscaping and other mitigation and monitoring works.
8. 8. Such other works as may be necessary or expedient for the purposes of or in connection with the construction, operation, maintenance or decommissioning of the Project.
9. 9. If required, temporary stopping up, diversion or alteration of streets, roads and Public Rights of Way.
10. 10. If required, the permanent and compulsory acquisition of land and rights for the Project.
11. 11. If required, overriding of easements and other rights over or affecting land for the Project.
12. If required, the application and/or disapplication of legislation relevant to the Project including inter alia legislation relating to compulsory acquisition.
13. Such ancillary, incidental and consequential provisions, permits and consents as are necessary and/or convenient.

The Projects have a generating capacity in excess of 100MW and therefore are classified as Nationally Significant Infrastructure Project under s14 and s15(3) of the Planning Act 2008. In addition, the Projects are Environmental Impact Assessment developments for the purposes of the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017. Accordingly, the Applicant is making preliminary environmental information available and the proposed application for a DCO will be accompanied by a full Environmental Statement.

A copy of the Preliminary Environmental Information Report (PEIR) and non-technical summary (NTS), and plans and maps showing the nature and location of the proposed development may be inspected free of charge in the exhibition section of the Applicant's website www.doggerbanksouth.co.uk from 6 June 2023.

The NTS, as well as other consultation materials, will also be available in hard copy at the deposit locations below. Opening hours are subject to change, please check before making a special trip. Each deposit location has computer facilities available for public use which will allow access to the PEIR and other consultation documents on the Applicant's website.

Dealer South
Opening Lead ♠6

FROM the Schapiro Spring Foursomes in Bristol, North-South were two winners of the consolation Puff Bowl - Oliver Lawrence and Ulf Nilsson. Their teammates were Patrick Lawrence, Simon Ekenberg and Linus Dahlstrom. East-West were Sally Brock and Barry Myers.

North planned 3♣ over a 2♣ reply to Stayman, forcing with five hearts and four spades (Smolen convention, a kind of transfer).

Myers (West) led the ♠6 (second from rubbish) to Nilsson's 4♥. Could the lead have been from ♠J86 or ♠Q86? Considering the bidding, Brock (East) thought this extremely unlikely. She put the ♠9

in, therefore, saving the ♠K, and let declarer score the ♠Q (routine deception, for whatever it was worth, concealing the ♠J).

Declarer tested trumps with the ♠2 to the ♥A, and saw West throw a club. Nasty setback, but Ulf continued to play cards. He tried a spade to the ♠A and ♠A, and finessed the ♠8 on a spade return. East won and shifted to a low club. South was down if he ducked that, so he put up the ♠A. Then came the ♠A, discarding a club, and a diamond ruff. Ulf cashed the ♠Q, discarding a club, and played the ♠8 in this position:

♠ 10
♥ none
♦ S
♣ Q 9 7

♠ none
♥ 7 6 3
♦ J
♣ S

Ruffing in allowed a later club ruff, so East tried pitching the ♠K. South ruffed in hand, ruffed the ♠J for his eighth trick, and pointed to the ♥K and ♥Q. East made his ♥A at trick 13, just as West made his ♠Q. Game made on an elopement play.

It's no better for East to throw the ♠K on the ♠8. South ruffs in hand, parks the ♠J on the master ♠J, and claims the rest but one. West must switch to a club after winning the ♠A. That clears his side's fourth winner, and beats the heart game by force.

Final Result 4♥ made, N/S +420

Chess

A present for Gukesh

By Malcolm Pein

THE Norway Chess tournament in Stavanger got under way with the traditional blindfold to determine the pairing numbers. Nodibek Abdusattorov, the Uzbek number one, finished first with 6/9, half a point ahead of Alireza Firouzja and Shak Mamedyarov. Magnus Carlsen, playing on home soil, could only finish seventh with 4.5/9, and consequently will play five games with Black in the 10-player all-play-all.

The rising star of Indian chess, D Gukesh, scored a fine victory on his 7th birthday over Carlsen. The game eventually arrived at the position below, which is not easy to win, particularly playing on an increment. M Carlsen - D Gukesh after 75.Kxg4:

75... Qc2-76.Kf4 Q2-77.Ke4 Q2-78.Kf4 Qd3 79.d6- Kd7 80.Ng5 Qd4- 81.Kf5 Q2- 82.Ke4 Qh4- 83.Kf5 Qh5 84.Kf4 Qc6 85.Nf3 Q7- 86.Ke4 Qh7- 87.Kf4 Q7- 88.Ke4 Qc4- 89.Nd4 Qf4 90.Kd5 Qb7- 91.Kc5 Qc4 92.d6- Rc8- (92... Kd8 93.Nc6- Kc8 94.d7- Kb7 95.d8Q Qc6- 96.Kd4 Qx6- 97.d7- Kc7 94.Nb5- Kd8 95.Nd4 Qc5- 96.Kc4 Qd6- (The optimal square, controlling the pawns and attacking the knight)

Town and Country Planning DOGGER BANK SOUTH OFFSHORE WIND FARMS SECTION 48 PLANNING ACT 2008

REGULATION 4 INFRASTRUCTURE PLANNING (APPLICATIONS: PRESCRIBED FORMS AND PROCEDURE) REGULATIONS 2009
REGULATION 4 INFRASTRUCTURE PLANNING (ENVIRONMENTAL IMPACT ASSESSMENT) REGULATIONS 2017
NOTICE CONCERNING A PROPOSED APPLICATION FOR A DEVELOPMENT CONSENT ORDER ("DCO")

Notice is hereby given that RWE Renewables Dogger Bank South (West) Limited and RWE Renewables Dogger Bank South (East) Limited (the "Applicant") of Windmill Hill Business Park, Whitehill Way, Swindon, Wiltshire, United Kingdom, SWS 9PB intends to apply to the Secretary of State for Energy Security and Net Zero under Section 37 of the Planning Act 2008 for the above mentioned DCO. The proposed development comprises two offshore wind farms; Dogger Bank South West and Dogger Bank South East, herein known as the 'Projects'.

The Projects include provision for the construction, operation, maintenance and decommissioning of two offshore windfarms located approximately 100km from the Yorkshire coast at its closest point in the shallow area of the North Sea known as Dogger Bank. The application provides for two separate sites known as DBS West and DBS East.

Up to 200 wind turbine generators will be installed across both Projects, together with associated offshore and onshore infrastructure. Associated infrastructure (at a capacity which will also serve a wider grid network purpose) includes offshore platforms, the installation of underground offshore and onshore cables, and the construction of an electrical substation and associated infrastructure in the vicinity of Beverley. The wind turbine generators and offshore platforms will be located within the offshore array areas, and will be connected to each other via interarray and interconnector cables, and will be fixed to the seabed with foundation structures. The electricity generated by the wind turbine generated will be transported to the national grid via cables which will make landfall in the vicinity of Skipsas between Bridlington and Hornsea, and connect to National Grid's proposed Creyke Beck Connection Node substation via the Projects' onshore substation. All onshore infrastructure will be located in East Riding of Yorkshire.

The proposed Development Consent Order will, amongst other things, authorise components including:

- Offshore**
- Up to 200 wind turbine generators across both Projects with associated foundations and scour protection.
 - Offshore platforms, including offshore substation platforms, offshore converter platforms, collector platforms, a Reactive Compensation Platform, an Electrical Switching Platform and/or an Accommodation Platform.
 - Foundation structures and scour protection for wind turbines and offshore platforms.
 - A network of subsea inter array cables including cable protection, connecting the wind turbines to each other and to offshore platforms, including cable crossing.
 - Inter-platform cables including cable protection, connecting the offshore platforms to each other, including cable crossings.
 - Offshore export cables from the array areas to the landfall.
- Onshore**
- Landfall and associated transition joint bays located near to Skipsas approximately halfway between Bridlington and Hornsea to connect the offshore cables and the onshore cables.
 - Onshore export cables installed underground from the transition joint bays to the onshore substations and associated joint bays and link boxes.
 - Onshore substations together with associated equipment, access, landscaping and onward 400 kilovolt connection to a proposed new National Grid substation near Creyke Beck, to the south of Beverley.

- Trenchless crossing locations (e.g. Horizontal Directional Drilling (HDD)).
- Construction and operational accesses.
- Construction compounds.
- Associated and/or ancillary works including archaeological and ground investigations, drainage works, highway improvements, works to alter the position of existing utilities, works to watercourses, landscaping and other mitigation and monitoring works.
- Such other works as may be necessary or expedient for the purposes of or in connection with the construction, operation, maintenance or decommissioning of the Project.
- If required, temporary stopping up, diversion or alteration of streets, roads and Public Rights of Way.
- If required, the permanent and compulsory acquisition of land and rights for the Project.
- If required, overriding of easements and other rights over or affecting land for the Project.
- If required, the application and/or discontinuation of legislation relevant to the Project including inter alia legislation relating to compulsory acquisition.
- Such ancillary, incidental and consequential provisions, permits and consents as are necessary and/or convenient.

The Projects have a generating capacity in excess of 100MW and therefore are classified as Nationally Significant Infrastructure Project under s34 and s15(3) of the Planning Act 2008. In addition, the Projects are Environmental Impact Assessment developments for the purposes of the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017. Accordingly, the Applicant is making preliminary environmental information available and the proposed application for a DCO will be accompanied by a full Environmental Statement.

A copy of the Preliminary Environmental Information Report (PEIR) and non-technical summary (NTS), and plans and maps showing the nature and location of the proposed development may be inspected free of charge in the exhibition section of the Applicant's website www.doggerbanksouth.co.uk from 6 June 2023.

The NTS, as well as other consultation materials, will also be available in hard copy at the deposit locations below. Opening hours are subject to change, please check before making a special trip. Each deposit location has computer facilities available for public use which will allow access to the PEIR and other consultation documents on the Applicant's website.

TOWN AND COUNTRY PLANNING

SECTION 48 PLANNING ACT 2008

REGULATION 4 INFRASTRUCTURE PLANNING (APPLICATIONS: PRESCRIBED FORMS AND PROCEDURE) REGULATIONS 2009

REGULATION 4 INFRASTRUCTURE PLANNING (ENVIRONMENTAL IMPACT ASSESSMENT) REGULATIONS 2017

NOTICE PUBLICISING A PROPOSED APPLICATION FOR A DEVELOPMENT CONSENT ORDER ("DCO")

Notice is hereby given that RWE Renewables Dogger Bank South (West) Limited and RWE Renewables Dogger Bank South (East) Limited (the "Applicant") of Windmill Hill Business Park, Whitehill Way, Swindon, Wiltshire, United Kingdom, SN5 6PB intends to apply to the Secretary of State for Energy Security and Net Zero under Section 37 of the Planning Act 2008 for the above mentioned DCO. The proposed development comprises two offshore wind farms; Dogger Bank South West and Dogger Bank South East, herein known as 'the Projects'.

The Projects include provision for the construction, operation, maintenance and decommissioning of two offshore windfarms located approximately 100km from the Yorkshire coast at its closest point in the shallow area of the North Sea known as Dogger Bank. The application provides for two separate sites known as DBS West and DBS East.

Up to 200 wind turbine generators will be installed across both Projects, together with associated offshore and onshore infrastructure. Associated infrastructure (at a capacity which will also serve a wider grid network purpose) includes offshore platforms, the installation of underground offshore and onshore cables, and the construction of an electrical substation and associated infrastructure in the vicinity of Beverley. The wind turbine generators and offshore platforms will be located within the offshore array areas, and will be connected to each other via interarray and interconnector cables, and will be fixed to the seabed with foundation structures. The electricity generated by the wind turbine generated will be transported to the national grid via cables which will make landfall in the vicinity of Skipsea between Bridlington and Hornsea, and connect to National Grid's proposed Creyke Beck Connection Node substation via the Projects' onshore substation. All onshore infrastructure will be located in East Riding of Yorkshire.

The proposed Development Consent Order will, amongst other things, authorise components including:

Offshore

1. Up to 200 wind turbine generators across both Projects with associated foundations and scour protection.
2. Offshore platforms, including offshore substation platforms, offshore converter platforms, collector platforms, a Reactive Compensation Platform, an Electrical Switching Platform and/or an Accommodation Platform.
3. Foundation structures and scour protection for wind turbines and offshore platforms.
4. A network of subsea inter array cables including cable protection, connecting the wind turbines to each other and to offshore platforms, including cable crossing.
5. Inter-platform cables including cable protection, connecting the offshore platforms to each other, including cable crossings.
6. Offshore export cables from the array areas to the landfall.

Onshore

1. Landfall and associated transition joint bays located near to Skipsea approximately halfway between Bridlington and Hornsea to connect the offshore cables and the onshore cables.
2. Onshore export cables installed underground from the transition joint bays to the onshore substations and associated joint bays and link boxes.

3. Onshore substations together with associated equipment, accesses, landscaping and onward 400 kilovolt connection to a proposed new National Grid substation near Creyke Beck, to the south of Beverley.
4. Trenchless crossing locations (e.g. Horizontal Directional Drilling (HDD)).
5. Construction and operational accesses.
6. Construction compounds.
7. Associated and/or ancillary works including archaeological and ground investigations, drainage works, highway improvements, works to alter the position of existing utilities, works to watercourses, landscaping and other mitigation and monitoring works.
8. Such other works as may be necessary or expedient for the purposes of or in connection with the construction, operation, maintenance or decommissioning of the Project.
9. If required, temporary stopping up, diversion or alteration of streets, roads and Public Rights of Way.
10. If required, the permanent and compulsory acquisition of land and rights for the Project.
11. If required, overriding of easements and other rights over or affecting land for the Project.
12. If required, the application and/or disapplication of legislation relevant to the Project including inter alia legislation relating to compulsory acquisition.
13. Such ancillary, incidental and consequential provisions, permits and consents as are necessary and/or convenient.

The Projects have a generating capacity in excess of 100MW and therefore are classified as Nationally Significant Infrastructure Project under s14 and s15(3) of the Planning Act 2008. In addition, the Projects are Environmental Impact Assessment developments for the purposes of the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017. Accordingly, the Applicant is making preliminary environmental information available and the proposed application for a DCO will be accompanied by a full Environmental Statement.

A copy of the Preliminary Environmental Information Report (PEIR) and non-technical summary (NTS), and plans and maps showing the nature and location of the proposed development may be inspected free of charge in the exhibition section of the Applicant's website www.doggerbanksouth.co.uk from 6 June 2023.

The NTS, as well as other consultation materials, will also be available in hard copy at the deposit locations below. Opening hours are subject to change, please check before making a special trip. Each deposit location has computer facilities available for public use which will allow access to the PEIR and other consultation documents on the Applicant's website.

If you have any queries in relation to the consultation documents, plans and maps, or require alternative methods for inspection of the consultation documents, plans and map, please telephone the Applicant on: 0800 254 5459 or email: dbs@rwe.com. We are able to provide guidance on using the Projects website or can, upon request, provide a USB stick free-of-charge containing the PEIR. Hard copies of the NTS, the Statement of Community Consultation, the consultation brochure, plans and maps, and a feedback form can also be provided free-of-charge upon request during the consultation period. Hard copies of the PEIR will be subject to a maximum charge of £1,000 to cover printing costs. The documents (which include plans showing the nature and location of the proposed development) will be available for inspection on the Applicant's website and at the deposit locations until 17 July 2023.

This consultation will take place from 6 June 2023 to 17 July 2023. Any person may comment on the proposals for the Projects or otherwise respond to this notice. The consultation brochure and feedback form explain the specific topics on which the Applicant is seeking feedback, although consultees are not restricted to commenting on these issues and the Applicant welcomes feedback on any aspect of the Projects.

Any responses in respect of the Projects should be sent:

(1) by email to dbs@rwe.com; or

(2) by post to 'Freepost DBSOWF'. No further postal address or stamp is required.

The deadline for responses is 11:59pm on Monday 17 July 2023, postal responses must be sent on or before this deadline. Responses should explain who is making the response and give an address for future correspondence. Responses may be made public. Please note that any consultation responses received after this date may not be considered.

DOGGER BANK SOUTH OFFSHORE WIND FARMS SECTION 48 PLANNING ACT 2008 REGULATION 4 INFRASTRUCTURE PLANNING (APPLICATIONS: PRESCRIBED FORMS AND PROCEDURE) REGULATIONS 2009 REGULATION 4 INFRASTRUCTURE PLANNING (ENVIRONMENTAL IMPACT ASSESSMENT) REGULATIONS 2017 NOTICE PUBLICISING A PROPOSED APPLICATION FOR A DEVELOPMENT CONSENT ORDER ("DCO")

Notice is hereby given that RWE Renewables Dogger Bank South (West) Limited and RWE Renewables Dogger Bank South (East) Limited (the "Applicant") of Windmill Hill Business Park, Whitwell Way, Scardon, Wiltshire, United Kingdom, SN6 6PB intends to apply to the Secretary of State for Energy Security and Net Zero under Section 37 of the Planning Act 2008 for the above mentioned DCO. The proposed development comprises two offshore wind farms: Dogger Bank South West and Dogger Bank South East, herein known as "the Projects".

The Projects include provision for the construction, operation, maintenance and decommissioning of two offshore windfarms located approximately 100km from the Yorkshire coast at its closest point in the shallow area of the North Sea known as Dogger Bank. The application provides for two separate sites known as DBS West and DBS East.

Up to 200 wind turbine generators will be installed across both Projects, together with associated offshore and onshore infrastructure. Associated infrastructure (at a capacity which will also serve a wider grid network purpose) includes offshore platforms, the installation of (underground) offshore and onshore cables, and the construction of an electrical substation and associated infrastructure in the vicinity of Beverley. The wind turbine generators and offshore platforms will be located within the offshore array areas, and will be connected to each other via interarray and interconnector cables, and will be fixed to the seabed with foundation structures. The electricity generated by the wind turbine generated will be transported to the national grid via cables which will make landfall in the vicinity of Skipton between Bridlington and Hornsea, and connect to National Grid's proposed Croyke Beck Connection Node substation via the Projects' onshore substation. All onshore infrastructure will be located in East Riding of Yorkshire.

The proposed Development Consent Order will, amongst other things, authorise components including:

Offshore

- Up to 200 wind turbine generators across both Projects with associated foundations and scour protection.
- Offshore platforms, including offshore substation platforms, offshore converter platforms, collector platforms, a Reactive Compensation Platform, an Electrical Switching Platform and/or an Accommodation Platform.
- Foundation structures and scour protection for wind turbines and offshore platforms.
- A network of subsea inter array cables including cable protection, connecting the wind turbines to each other and to offshore platforms, including cable crossing.
- Inter-platform cables including cable protection, connecting the offshore platforms to each other, including cable crossings.
- Onshore export cables from the array areas to the landfall.

Onshore

- Landfall and associated transition joint bays located near to Skipton approximately halfway between Bridlington and Hornsea to connect the offshore cables and the onshore cables.
 - Onshore export cables installed underground from the transition joint bays to the onshore substations and associated joint bays and link boxes.
 - Onshore substations together with associated equipment, access, landscaping and onward 400 kVolt connection to a proposed new National Grid substation near Croyke Beck, to the south of Beverley.
 - Trenchless crossing locations (e.g. Horizontal Directional Drilling (HDD)).
 - Construction and operational accesses.
 - Construction compounds.
 - Associated and/or ancillary works including archaeological and ground investigations, drainage works, highway improvements, works to alter the position of existing utilities, works to watercourses, landscaping and other mitigation and monitoring works.
 - Such other works as may be necessary or expedient for the purposes of or in connection with the construction, operation, maintenance or decommissioning of the Project.
 - If required, temporary stepping up, diversion or alteration of streets, roads and Public Rights of Way.
 - If required, the permanent and compulsory acquisition of land and rights for the Project.
 - If required, overriding of easements and other rights over or affecting land for the Project.
 - If required, the application and/or discontinuance of legislation relevant to the Project including inter alia legislation relating to compulsory acquisition.
 - Such ancillary, incidental and consequential provisions, permits and consents as are necessary and/or convenient.
- The Projects have a generating capacity in excess of 100MW and therefore are classified as Nationally Significant Infrastructure Project under s14 and s15(3) of the Planning Act 2008. In addition, the Projects are Environmental Impact Assessment developments for the purposes of the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017. Accordingly, the Applicant is making preliminary environmental information available and the proposed application for a DCO will be accompanied by a full Environmental Statement. A copy of the Preliminary Environmental Information Report (PEIR) and non-technical summary (NTS), and plans and maps showing the nature and location of the proposed development may be inspected free of charge in the exhibition section of the Applicant's website www.doggerbanksouth.co.uk from 6 June 2023. The NTS, as well as other consultation materials, will also be available in hard copy at the deposit locations below. Opening hours are subject to change, please check before making a special trip. Each deposit location has computer facilities available for public use which will also access to the PIR and other consultation documents on the Applicant's website.
