Appendix 12.5 - Agricultural land Classification Measurements Explained

Order Limits

- 12.1.1. The Agricultural land Classification (ALC) Study Area is measured to the outer line, as below, being the Order limits.

PV Arrays Plus Peripheral Land

- 12.1.2. The ALC measurement is the yellow area formed of PV Arrays plus the 'peripheral land' within each field between the PV Arrays and the field boundary, as illustrated below. It is considered that the strip between the PV Arrays and the field boundary is not likely to be farmed. On the Works Plans [EN010127/APP/2.2] the 'peripheral land' is shown within the Mitigation and Enhancement Areas.
