Representative Viewpoint 15 (Left) - Rural lane to the south of Newell Wood

Existing View:

This viewpoint is representative of walkers and motorists using the rural lane to the south of Newell Wood located approximately 496m to the north-west of the Solar PV Site within the north-western parcel. The existing view extends along the rural lane towards the mixed woodland at Little Warren and the undulating arable farmland to the south-east of the viewpoint.

Operational Phase Effects:

The proposed north-western parcel would be visible in the middle distance within the arable farmland on the plateau to the south-east of the mixed woodland at Little Warren. The Solar PV site in the north-west parcel would comprise a relatively minor component of the view to the south-east of the viewpoint. The scale of effect would be **small (adverse)** at year 1

reducing to **negligible (neutral)** by year 15 once the existing and proposed boundary hedgerows are managed over time for additional visual screening.

For viewpoint locations refer to Figure 6.6: Zone of Theoretical Visibility (ZTV) Study, Representative Viewpoints and Illustrative Viewpoints.

Camera Location (OS Grid Reference): 500602 E 314065 N
Ground Level (mAOD): 72.7m
Direction of View: bearing from North (0°): 185°
Distance to Solar PV Site: 476m
Horizontal Field of View: 360° (Cylindrical projection)
Paper Size: 420mm x 297mm (A3)

Enlargement Factor: N/A
Visualisation Type: Type 1 (for context)
Photo Date / Time: 24/06/2022 13:33
Camera Model and Sensor Format: Canon EOS 6D, FFS
Lens Make, Model and Focal Length: Canon EF50mm f/1.8 STM
Height of Camera Lens above Ground (mAOD): 1.5m
