

Submission ID: 16226

Would it be possible expand the agenda for Principle Issue 8 (Land Use & Soils) in EN 010217-000353 rule 6 letter to be expanded to cover The Effects on soil quality during construction?

Issue 12 (Water and flood risk) would also benefit from including consideration of the effects of construction upon soils.

Also I would like to draw the planning inspectors attention to the local elections which may necessitate the formation of a new Parish Council in Greatford which may affect who will be representing Greatford Parish Council at any forthcoming hearings either by written representation or orally.
