

I received the Email of invitation from the Planning Inspectorate on 13th April 2023. As an Interested Party I am entitled to take part in the Examination Process. However, as I understand, I am required to repeatedly register to attend in person and or make a written submission in advance to these events by the programmed deadline dates. The first deadline is twenty days after the letter from you explaining the Examination format and process. This timetable and process is complicated for me to understand and digest all the procedural requirements and details. Using Acronyms and Annexe referencing makes reading comprehension extremely complex and disjointed. The current timetabled process is not allowing me sufficient time to proactively engage. My daily work prevents me from spending the time necessary to fully comprehend this process. I already feel intimidated, undervalued, disadvantaged and mistrustful with this process.

In order to ensure that I can complete this process please can I request the following considerations:

1. Additional time allowed for in depth understanding of all documents presented during this examination.
2. Late delivery of representations should be positively considered.
3. Language usage should be accessible by simple delivery and format.
4. One registration should be sufficient for all activities.
