

Langtoft Parish Council although not adjacent to this Planning application of such an immense solar factory, we are still in the local area and wish to object to the industrialisation of the local landscape. In Langtoft we have a huge gravel extraction application and this combined with the solar industrial units huge block expanse, completely engulf the whole area in a 15 mile radius to the extent that it will completely overwhelm and engulf the character and appears of this part of Lincolnshire to all residents detriment. We wish to support our local parish council's that boarder Langtoft and who are closer to this application area and completely concur with the arguments put forward by the Mallard Pass Action Group against to this proposal.
