

Throughout the process of the mallard pass application my position has not changed. It is too big and on agricultural land in beautiful countryside. The damage to habitats will be great. Ground nesting birds will move on and even after it is up and running may not return. Deer will be permanently banned from the site and the upheaval to other species while work is done is not to be underestimated. Agricultural land should be agricultural land, we need all the land possible to maintain food supplies. a local farmer has said it cannot be used again for agriculture once it has gone to a solar farm.
