Subject: Site visit request

Good morning,

I write as I think I misunderstood and so missed an opportunity to request a site visit when I completed my submission of information for Deadline 1 on 30 May.

I did submit my written precise of my verbal statement at the OFH2 and I have also requested to speak at the CA hearing. What I hadn't appreciated was that I was able to request a site visit so I could physically show how we will be directly affected by the scheme should it go ahead. As I mentioned in my verbal report to the OFH we live just 210m from the panels in field 4 and will be able to see panels from our downstairs rooms, & upper floor rooms and garden which face either south and/or west. Our property is identified as being impacted by Glint & Glare and we will also be impacted by the temporary compulsory acquisition powers being sought by the Applicant.

I would be very pleased to host a visit to show the impact on us personally should you be able to accommodate this late request.

With kind regards

Helen Woolley
